The solar powered flashing LED bordered stop signs (flashing stop signs) run about $2,000 for each sign.

The solar powered rectangular rapid flashing beacons (RRFB's) are for pedestrian crossings. (We have them by the YMCA, the Roundabout, by Wilson Middle School and St. Francis of Assisi on Waldo). These RRFB's run about $8,000 per each pedestrian crossing.

There is a pedestrian crossing treatment policy or guidelines. See the attached link. https://www.manitowoc.org/DocumentCenter/View/26070/Pedestrian-Crossing-Treatment-Installation-Guidelines.

The issue always ends up being who is funding these stop signs or RRFB's. Several years ago, Jackson Grade School requested the RRFB's for both Menasha Ave. and North 18th St. and at that time the Committee was asking the School District to pay for some or all of the cost of the lights/signs and because of that it never moved forward.

There is generally no money budgeted for these type of signs. Therefore, these requests normally go to one of the parent Committees (P.I. or P.S.), then CAWG and then Finance Committee for approval as an unbudgeted request.

I can certainly add this to the agenda as a discussion item. Maybe it would be beneficial for Greg Minikel from engineering to provide some information on rapid flashing beacons to familiarize the committee. I know they come at a rather costly and when placed everywhere they tend to become overlooked like other signs throughout the City.

Amber,

Here's one more to add for discussion.

Again, please let me know if we can ad this or not and copy Alder Boldt please.

Thanks, Bill S

> How do I go through to try and get flashing solar stop signs near our schools?
> I was told they cost approx $2000. Do we have to get special funding. I like the one they have by Jackson Elementary. I would like to see one on 16th and Division (north bound). I till have to go to a couple of the other schools to see if would be wise to put others up as well.
