Yes Mike to extend the driveway a new driveway permit will cost \$40. It should be noted that you would need permission to make the driveway larger then 35'. I found an old plan you sent me showing the driveway off of I Tech and that you want to make it 70' wide. Greg will take this to the Committee next week to get permission. Attached is the plan you sent me dated February 22, 2022. Do you have a more current version?

Well, then I would like to get that one permit (\$40?) when I stop in with payment for the local early start.

Yes if you are doing driveway work in the right of way you need a permit.

How much is that for the sidewalk driveway permit?

I just got an invoice from Lisa for the local early start so I am trying to get all the totals and bring along all the checks.

That would be a sidewalk driveway permit.
Right of way excavation permit is needed for the utility connections in the right of way.

Do we need a right of way permit to do the curb cuts and pour the driveway aprons?

Attached are pdf's of the revised civil plans. The asphalt edge is moved to the south. I have to send the contractor the cad files so I will copy Mike on that e-mail.
