RE: Request for 63-Foot-Wide Driveway for Sadoff Iron and Metal Co. at 1600 South 26th St.
(Item 22-0640)

Members of the Public Infrastructure Committee:

Sadoff Iron and Metal has requested the installation of a new 63-foot-wide driveway in order to accommodate the installation of their new above ground truck weighing scale.

The Manitowoc Municipal Code has a maximum driveway width of 35 feet for commercial or industrial properties, unless the Council approves a wider driveway.

We do not see any significant issues with the request. The speed limit is 25 mph and there is good sight distance in the area.

Therefore, we are recommending that the PI Committee and Council approve the wider driveway.
