Mr. Able,

I was recently at a public input meeting concerning the city bus service, and I had suggested to Mr. Don Koski (Director of Public Infrastructure) about the need for crosswalks at the intersection of Menasha Avenue and Kellner Street. Mr. Koski suggested I contact you via e-mail voicing my suggestion, because you are the chairman of the Public Safety Committee.

My special needs adult son crosses this intersection several times a week while either being picked up or dropped off by the city bus on the southeast corner of the intersection. For my son's safety and the safety of a number of students in our neighborhood who regularly cross this intersection to catch the city bus, I respectfully request the City of Manitowoc to consider putting in crosswalks at the intersection of Menasha Avenue and Kellner Street. I believe this would be an easy fix considering there are existing sidewalks at all four corners of this intersection. Any questions, let me know.

Thanks!
