Dan,

Would we want Committee/Council approval before we do this?? I also think that this is a good idea. It is proactive in lieu of our past efforts, which were reactive and just sending out letters when we found violations.

This sounds like a good idea. We could send lists to the Redi-mix companies also.

It was brought to my attention that the city of Two Rivers has designated areas for the concrete trucks to wash out. This is a reoccurring problem of where the trucks wash up. I spoke to Scott Ahl from the Two Rivers engineering Dept. He said they have a couple of spots throughout the city where they placed some silt fence around a small depression and allow the trucks to wash up there. Then they come and clean them up a couple of times a year.

I feel we should come up with some areas to do this also. The two easy ones are the N 8<sup>th</sup> street Snow dump site and the Michigan Ave Snow dump by the Cemetery.

Other possible areas could be

1. Clay Pit Road
2. Vits Drive
3. Spring street turnaround area just below Huron St.
4. Possibly Lower Schutte Park
5. Green Street Boat Ramp area. (Parks Dept already dumps beach grooming debree there)
6. DPI and Parks yards.

Let's Discuss. Please respond with comments or additional areas that could be utilized so we can come up an acceptable number of locations.
