Department: Police Dept.

| Name of Training | Dates of Training | Location of Training |
|-------------------------------|--------------------|----------------------|
| New World Training Conference | April 24 -26, 2016 | Phoenix, Arizona |

| | |
|----------------------------------|------------------------|
| Estimated cost of training | \$1495 |
| Estimated cost of travel | \$325.10 |
| Estimated cost of meals | \$50 |
| Estimated cost of accommodations | Included in the \$1495 |
| Estimated cost of misc. expenses | \$119 |
| Total estimated cost | \$1989 |

Requesting Supervisor/Manager Comments: I feel that it is in our department's best interest for me to attend this conference. New World was just bought out by Tyler Tech. and there are numerous new contacts to meet and discover what the expectations are moving forward. Tyler Tech will be able to answer questions that we have about the future of our RMS, CAD, and Mobile systems.

What are the objectives for the training? I would like to attend Tyler Technologies' 2016 New World User Conference April 24-26 at Arizona Biltmore in Phoenix, AZ where I will have the opportunity to discover new ways to boost productivity and improve our services by getting the most from using our New World Public Safety Dispatch, Mobile Computing, and Field Reporting solutions. Not only will I be able to interact and learn directly from Tyler Public Safety staff, the conference will also allow me to meet other public safety officials, administrators, supervisors, etc. from across the country to exchange ideas, insight and solutions to common problems.

How will this training be shared / implemented upon return? This knowledge will be used to enhance our RMS, CAD, and Mobile systems.

How will this training benefit the City? This training will help provide information regarding our record keeping, dispatching, and our field reporting. These systems are the basis for our police department to operate efficiently and effectively.

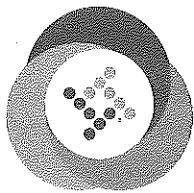

What is the return on the investment? There is not a monetary ROI for this. However, networking can provide me with a better understanding of the current and future systems and contract. I will gain valuable knowledge for future billing and contract negotiations which has a potential to save the city money.
