Subject: Items for August PI Comm. Meeting

I would like to add an item for the Waldo Blvd. Viaduct (N. 23rd to Fleetwood Dr.) and the possibility of paving a thin layer (1-1/2") of asphalt on the eastbound lanes. There is approx. 900 ft. west of the bridge and 800 ft. east of the bridge. 1,700 ft. by 25 ft. = 4,722 SY. At 1.5" avg. thickness, this equates to approx. 425 tons. Assuming \$90/Ton we are looking at \$38,250. If we only repaved the west side (southwest quadrant) it would be about 225 Tons at \$90/Ton would be \$20,250.
