Subject: FW: need additional street light

Hello Dan and Greg,

Please refer to the attached email request of a resident asking for an additional alley light at 939 North 8th Street. There are three, functional lights in the alley, and she is requesting another on the pole behind her home. I spoke with her and she said that the existing lights are working and that it was very dark in the alley by her home.

MPU has no warrant for alley lighting and believes a light at this location is elective on the part of the city.

I have attached a map to indicate the subject address and existing light fixture locations.

Would you please advise?

Steve

Hi Steve:

Please see below. Do we have information on our website about how customers go about requesting an additional street light? I recall you had told me there has to be some sort of a petition or something along those lines but I wasn't exactly sure on the process so I didn't want to contact her yet.

Please advise if you would give Kathleen a call back or otherwise refresh my memory on the process so I can let her know.

Thank you,

Samantha Johnson | Administrative Assistant

Subject: need additional street light

Sam,
Kathleen Brennen with call back of 684-8898 lives at 939 N 8th street. She said in their alley there are street lights at each end. There is a pole in middle but no lights on it. She believes there used to be lights on that pole. She feels it is very dark in the alley and there should be light in middle on pole that is already there. I told her you or Steve would give her a call back.

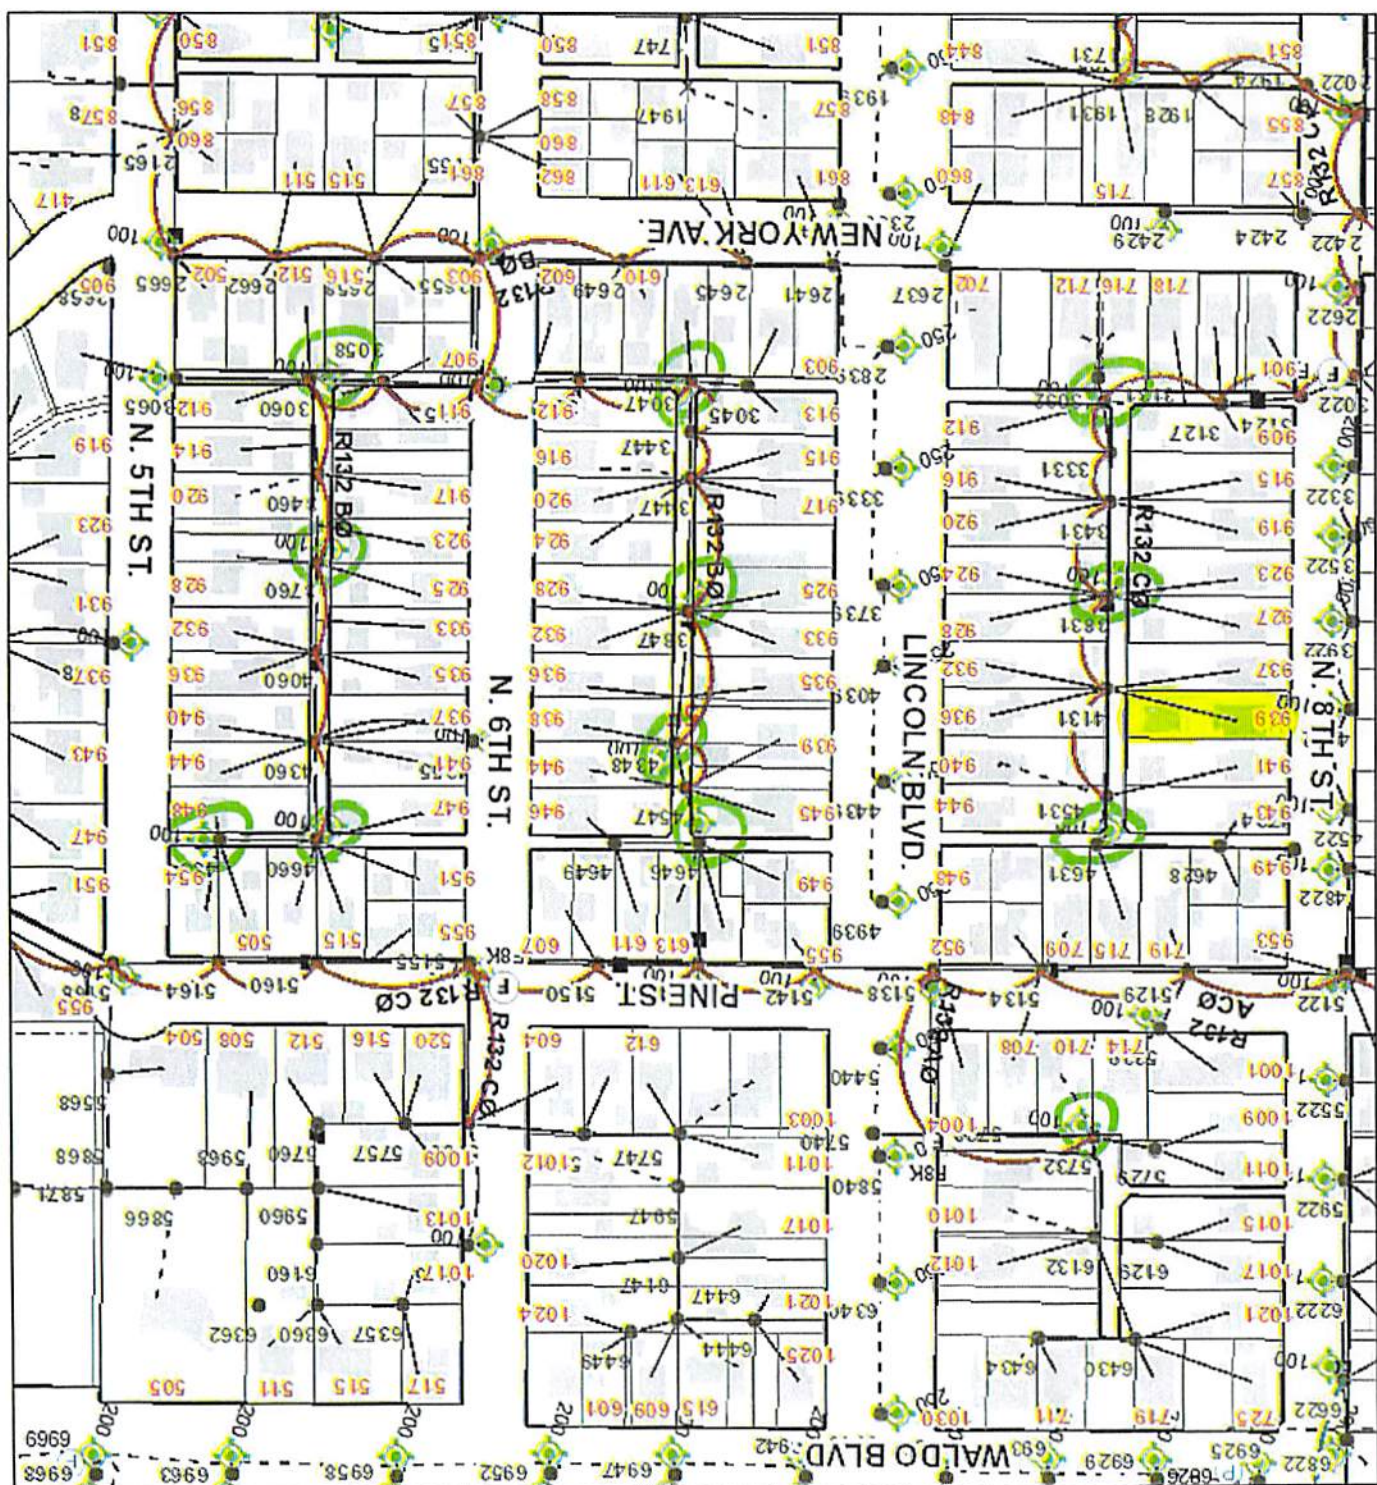

Thank-you

Virginia
