Subject: Loop detectors

There is another loop detector to add to the inop list if you weren't aware of it already. 30th street loop @ 30th and Calumet is stuck on. Mark said there are two options here: 1) new in ground loop or 2) above ground micro wave sensor. Both about 5k each. The intersection is safe, but calls for traffic constantly on the side street even when there are no cars there.

We also have the Rapids and Waldo and Calumet and Dewey that aren't working which we knew about already. Also Dufek, but that's now is the state's baby.

Dan,

Do you think we could/should do an unbudgeted request for this? My opinion is that it should be fixed.

Could this come out of the CRAP list?
