Greg,
I would say that this is the implied lane use at this time, there should not be any required changes to loop detector delay timing or electrical changes required for what you propose. Are you going to get the pavement arrows painted in epoxy if this moves forward?

Dan,

I pulled out the signal plans and the aerial photo.

Perhaps, we should discuss this with Randy at our meeting next Tuesday.

If we want to paint it, then this should also go to the PI Comm. for their approval.

We will also need to install the lane use signs if we paint the lane designations.

Mark,

Would there be any issues with lane allocations on S. 41st St./Grand Ave. as far as the signals and loops are concerned.

I am guessing that this person wants the right lane to be right turn only and the lane abutting the centerline would be for left turners and the thru movement.

I believe that this is similar to what we just did this fall at the Rapids/Custer intersection.

Randy Yindra

.Would it be possible to paint an arrow on 41st and Calumet? I go down 41st a lot and there are people who go in the right lane and cross Calumet. There will be an accident there sooner or later.

Thanks

- Justin
