Manitowoc, WI 54220

Attn: Purchasing or Management

OSI Environmental Inc. (OSI) would like to thank you for using our recycling/disposal services. Due to the spiraling downturn in oil markets over the past six months, current used oil markets are paying “far less” than OSI’s cost to collect your used oil, and many refineries are not accepting used oil due to overstock and low base oil prices.

Because of these factors OSI must implement charges to collect your used oil.

Please note effective Feb 1st 2016

- \$100.00 service fee for used oil bulk and drum pickups – less than 500 gallons
- \$150.00 service fee 500 – 1000 gallons
- \$200.00 service fee amounts over 1000 gallons

Please note: Regularly serviced accounts receiving weekly or bi-weekly service will be invoiced a monthly service fee based on their combined total gallons “per month”.

Example: 4 weekly oil collections totalling 1600 gallons = \$200 monthly service fee.

Please contact our office if you would like your used oil collection updated to a call-in service rather than a routine service stop. If you choose this option please allow 48 hours for service. We will work with you and your OSI service representative to update your preferences.

Thank you for working with OSI and please keep in mind, as the market changes we will keep reviewing your account and continue to offer fair competitive rates for used oil recycling and related services.

Sincerely,

Jon L. Burkert
