**Fiscal Impact:**

At the time, indeterminate of exact dollar amount of fiscal impact. Anticipated additional revenue to be received in General Transportation Aids from State due to additional road miles being the responsibility of the City. Known expenses that will increase due to the additional road miles being the responsibility of the City are but not limited to: labor/equipment: snow plowing, grass cutting, grading of gravel; materials/supplies: salt/brine for winter maintenance, latex/epoxy paint/service for maintenance of markings; general maintenance expenses associated with roads as time lapses since new construction. It is anticipated expenses will be more than revenue received; however, it is of the opinion of the Finance Director that having the above named section of road under the ownership of the City is in the best interest of the City for control, task management, and consistency.

**Funding Source:**

2024: DPI Budget for street maintenance. 2025 and beyond, incorporated in each year’s budget proposal requesting adoption.
