

General Plow Report

Date(s) of GP: 12/14/17 Pickup 12/15/17
 Hours of GP: 10.75 hrs 8 hrs

Amount & Description of Snowfall: 9" medium to light
Snow, temp. over was 23° that day with light wind

Summary of Activities: Storm started around 3am on
12/13/17. Crews maintained Salt Rts until 4:30pm.
We kept one person on emergency route and sent
others home to sleep until 12am. Everyone had
about 7 hours off. G.P. & limited Pickup took
place on 12-14-17. Detailed pickup took
place on 12-15-17. On 12-14-17 all salt
routes & side streets were salted again after 6P.
Crews worked about 10 hrs on 12-14-17.

Equipment Breakdowns: 1- Wacker Loader for a
compute- malfunction down all night.

- Ideas for Improvement:
- ① Different radio Channel for operators
to talk on separate from call in channel
 - ② Always have snow emergency put on early. They guys
said there were half the cars that there normally had been
on the street.
 - ③ Have the emergency route operator start later the
day before G.P. if possible so they don't have to work
20 hrs.
