Hi Paul,

I finally got the decking quote last night; thanks for your patience.

The cost breakdown is as follows:

- Set up, insurance, etc. = \$1,500
- Remove & dispose of existing decking and install new 2x treated nailer boards = \$2,350
- Furnish & install new "flow-thru" open cell deck panels (1' x 5') = \$4,425
- Furnish & install 2 ½" x 1 ½" x 3/16" aluminum angle borders to fill 2" gaps on each side of the 5' deck panels (5'-4" existing width) = \$1,350

**TOTAL PROJECT COST = \$9,625.00**

If this looks acceptable, I can formalize this in a proposal for you.

Please call with questions; thanks.

Hi Paul,

I expect to have the Thru-Flow Decking quote back any day now and should have a proposal for you by the end of this week.

Sorry this is taking so long,

**Ted Jennejohn**

Hi Ted, I also left you a voice message. Attached is the decking that was used at the transient dock. Could you provide us with an estimate to remove & replace the decks boards on the pedestrian bridge that is on the east side of the 8<sup>th</sup> Street Bridge. The underlying wood stringers may need to be replaced also. I would like to use the same decking shown below to match the transient dock. Call me with any questions. If you guys are too busy with other projects let me know and I'll look into other options. Thanks Paul

Hi Paul,

I've attached some information about different grating products that might be a good solution for the bridge & boardwalk decking problems.

Please share this with any interested parties and let me know which product, if any, you'd like me to pursue.

Thanks,

**Ted Jennejohn**
