

# General Plow Report

Date(s) of GP:

GP {	1-16-18	1-17-18	} D.T. P.U.
Hours of GP:	8.2 hours Plowing	6 hrs	

Amount & Description of Snowfall: 10" Very Light Fluffy

Summary of Activities: On morning of 1-15-18 Karen had Salters in for 1". We then maintained Salt Routes all day until 4pm. We kept 1 person on for E-route from 4-12am. At 12am on 1-16 we started a G.P. on entire city. Salters worked up til about 2pm on 1-16. At 12am on 1-17 we did a detailed pickup of snow on Calumet + down town. All Salt routes were salted again after the pickup.

Equipment Breakdowns: A few minor that were repaired during operations.

Ideas for Improvement: ① Go over side walk lift and form another route just for doing down town pickup.

② Take time to train new operators for tips to make plowing go faster.
