

Camp Uits MTB Trail

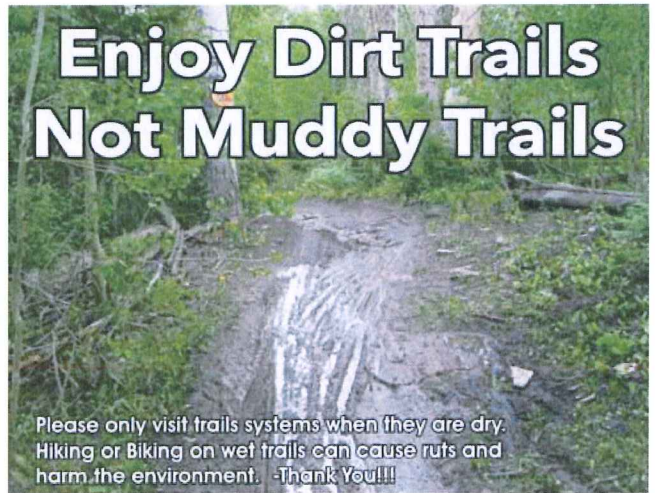

Since being granted permission to design a MTB Trail System in the park, illegal activities has stopped. (Motorized vehicle use and Hunting) Motorized Vehicles have left devastating user impact such as deep ruts through out the park along with displacing plant life.

We have collected and removed 300 gallons of trash.

We used outside resources to help determine if our trail design will harm or displace vegetation and wildlife.

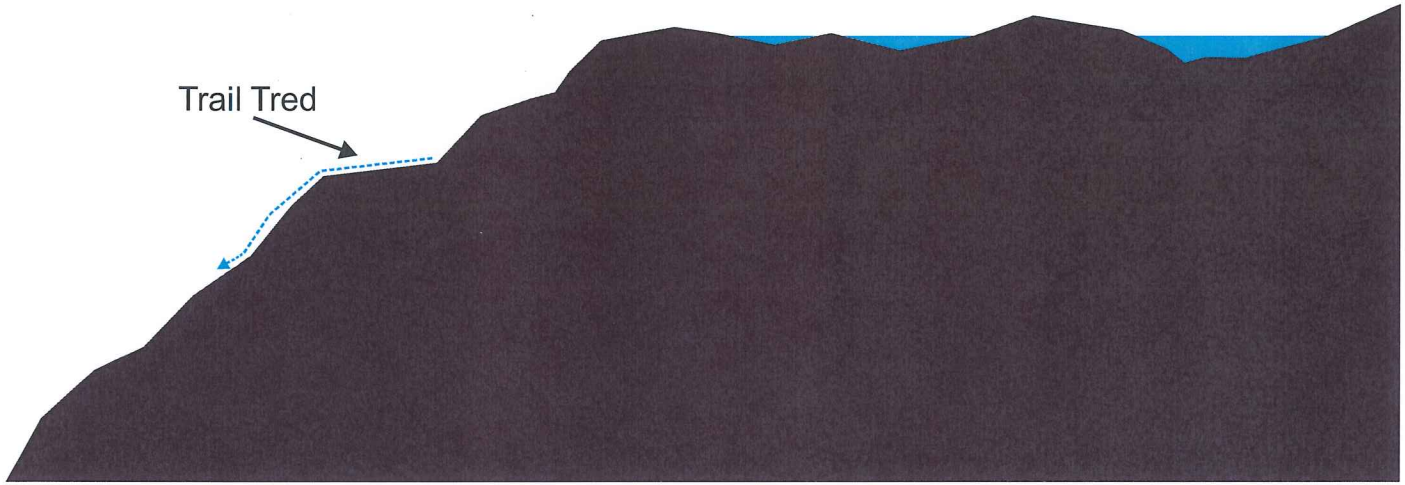

Promoting environmentally safe trail design and use.

Water can easily sheet off the hillside Trail Tred.

Raising the trail off the ground will let people enjoy the park most of the year.
