## MEMO

**TO:** Common Council

**FROM:** Dan Koski, PE, Director of Public Infrastructure 

**DATE:** February 13, 2020

**RE:** Purchase of Jetter Truck for the WWTF / DPW  
Quote #QE-20-5

After review of the three quotes received for the Jetter Truck, staff determined that two of the three quotes did not meet the requirements of the spec. If we were to award to either of the two lower bids, we would need to spend an additional \$10,000 for items that were not included in their spec, but were requested to be.

Therefore, in this case, we recommend awarding to Macqueen Equipment, as they did include all items in the spec. Even though their quote was higher than the other two, when figuring in the additional funds required to bring the other two quotes up to spec, they are actually the lowest.

Thank you very much for your consideration.
