**Subject:** addition to agenda

The zoo society would like to get an osprey platform put up in the zoo. This is currently in our long range plan to add this platform. They are working with the MPU now to get the poles installed for the vertical jump exhibit. They would like to add another pole somewhere in the east end of the zoo ( location to be determined) for the osprey and eventually add a camera to it to view. They would like permission to have the another pole installed while the MPU is on site for the current project. They would like this added to the P & R committee agenda with your permission.

Thanks,

*Denise Larson,*
