This would need to come from unbudgeted since it never appeared on an ELF listing.

Therefore, it will need to go to PI and Finance committees.

Use the voting buttons above.

Subject: Hydro hose crimper

Good Morning Kim

This request is coming to you because the current Hydraulic hose crimping machine that we have at the DPW shop is failing. This is a big SAFETY concern, The current machine does not the power to make the final crimp on the hose connection being made. There is no more rebuilding this unit any more that it has been done twice according to the shop Guys. Mike said the current unit was new when he started working for the City 25 years ago. We do not have a 24/7 hose service in the city to get hoses made, So this would be a critical piece of equipment for any and all hydraulic hose repairs for DPW,MPU, FIRE, PARKS, and any other piece of equipment with a hydraulic hose on it.
