CITY CLERKS OFFICE

To whom it may concern,

We want to suggest that a pedestrian countdown signal be placed on the corner of Franklin and 21st st. going North. When one drives downhill on 21st street, especially during rain or snow, it is difficult to stop or know when to start slowing down. since the light change from green to yellow to red is unpredictable and you don't know when it's going to change. The risk of skidding is too high, but with the pedestrian countdown signal it would be easier and you would know how much time you have left to pass, or to slow down and stop.

Thank you in advance
for your consideration
in this matter,

Sincerely,

The Yaca family
