# CITY OF MANITOWOC ZONING REWRITE

SUMMER 2025 OPEN HOUSE MEETING

# PROJECT OVERVIEW:

# SUMMARY & TIMELINE

### **PROJECT SUMMARY**

The City of Manitowoc has embarked on a comprehensive rewrite of its Zoning Code to balance the City's diverse needs and goals, make the code easier to understand and administer, and align with the City's recent planning efforts including the Comprehensive Plan and Downtown Master Plan. The project team including City staff and consultants GRAEF and Civi Tek have been working diligently for a year and a half to produce a draft zoning code for community input.

This board includes the project schedule and status along with community feedback. Early in the zoning rewrite process, the project team shared a community survey to determine what the community would like to see as a part of the zoning rewrite. The results from that survey were shared at the October 2024 Plan Commission and are included below.

### WHY UPDATE THE ZONING CODE?

- The original zoning ordinance was written more than 50 years ago and is now outdated and does not aways reflect best zoning and planning practices.
- The code has also become more confusing as needed amendments have been made over the years.
- State statutes have also changed, so we need to align our code to those new requirements.
- Aside from that, we have a unique opportunity to update our zoning code to pursue our vision for the future of Manitowoc.
- New technology allows us to develop a zoning code designed for ease-of-use with graphics, tables, and online compatibility to create a modernized code.

| Top issues by selected groups:         |                                  |                     |
| Overall:                               | < 65 years old:                  | 65+ years old:      |
| Business, Industry, Safety,            | Business, Industry, Safety,      | Business, Industry, |

### Majority (>50%) of users listed all issues as at least "Important."

- Attracting new business and industry was rated most important by all groups, along with public safety and local businesses.
- Parking and Public Transportation were rated least important across most groups, especially compared to walking and biking.
- Users 65+ also emphasized property maintenance.
- Families w/ children also emphasized environmental protection and affordability.
- Households w/ no children also emphasized walking and biking.

#### Thinking of your neighborhood, which of the following uses would you add?

| Neighborhood Uze  | Support | Neutral | Oppose |
|---|---------|---------|--------|
| Parks/open space  | 75%     | 19%     | 6%     |
| Medium single family homes (900-1,800 square feet)                                    | 72%     | 24%     | 4%     |
| Small-scale neighborhood retail (café, bookstore, convenience store, bike shop, etc.) | 67%     | 21%     | 12%    |
| Senior housing  | 53%     | 37%     | 10%    |
| Small condos or apartments (3-4 units)  | 49%     | 30%     | 21%    |
| Small single family homes (under 900 square feet)                                     | 48%     | 29%     | 23%    |
| Urban agriculture and/or community gardens  | 45%     | 40%     | 15%    |
| Accessory dwelling units  | 41%     | 38%     | 21%    |
| Duplexes  | 41%     | 36%     | 23%    |
| Daycare/childcare facility  | 40%     | 46%     | 14%    |
| large single family homes (1,800-3,000 square feet)                                   | 40%     | 40%     | 20%    |
| Townhomes   | 37%     | 36%     | 27%    |
| Condos or apartments with ground-level retail in the same building (mixed use)        | 36%     | 35%     | 29%    |
| Medium condos or apartments (5-9 units)   | 35%     | 35%     | 29%    |
| Non-emergency medical services (clinic, dentist, optometrist, etc.)                   | 32%     | 52%     | 16%    |
| Dog park  | 29%     | 45%     | 26%    |
| Large condos or apartments (10+ units)  | 26%     | 28%     | 46%    |
| Very large single family homes (3.000+ square feet)                                   | 14%     | 40%     | 46%    |

### Broad support for increased neighborhood retail uses and parks.

- Strong support also expressed for medium/small homes, apartments, and condos, including accessory dwellings.
- Large single family homes, townhomes, mixed-use, and medium condos/apartments were similarly rated.
- Strongest opposition expressed towards very large single-family homes and large condos or apartments.

#### Top uses by selected groups:

| Overall:                   | < 65 years old:             | 65+ years old:                | Families w/ children      | Households w/ no children |

| Neighborhood Retail        | Medium-scale Homes          | Homes, Senior Housing         | Neighborhood Retail       | Neighborhood Retail       |

#### Downtown

| As the Downtown evolves, which of the following uses and features would<br>you like Manitowoc to explore?  | Support | Neutral | Oppose |
|--|---------|---------|--------|
| Require waterfront development to provide public access to the waterfront (boardwalks,<br>riverwalks, parks, piers, docks, etc.)   | 88%     | 9%      | 3%     |
| Allow sidewalk sales and outdoor merchandise sales   | 76%     | 13%     | 11%    |
| Encourage more outdoor dining  | 72%     | 24%     | 5%     |
| Grant height/density bonuses to incentivize historic preservation, improved architectural<br>design, and public way improvements   | 63%     | 26%     | 11%    |
| Grant height/density bonuses to incentivize sustainability improvements (green roofs,<br>energy efficient buildings, solar power, green stormwater infrastructure, etc.) | 60%     | 24%     | 16%    |
| Require public space as part of new large-scale developments and redevelopments  | 54%     | 30%     | 16%    |
| Allow taller buildings   | 53%     | 35%     | 11%    |
| Allow increased density  | 48%     | 34%     | 18%    |
| Grant height/density bonuses to incentivize affordable housing and equitable<br>development  | 45%     | 34%     | 20%    |
| Allow reduced parking requirements for new residential developments Downtown (non-<br>residential development Downtown currently requires no minimum parking)            | 42%     | 42%     | 15%    |
| Encourage dog-friendly establishments  | 38%     | 35%     | 27%    |
| Allow small-scale, light manufacturing and production Downtown   | 35%     | 41%     | 24%    |

#### Calumet Avenue

| Which of the following would you like Manitowoc to explore along                                     | CONTROL OF | NICOS DE LA CONTRACTOR DE | CANDELLES. |
|--|------------|--|------------|
| Calumet Avenue?  | Support    | Neutrai  | Oppose     |
| Safer sidewalks and pathways separated from the roadway  | 81%        | 17%  | 2%         |
| Allow residential apartments/condos above retall buildings (mixed-use buildings)                     | 79%        | 13%  | 8%         |
| Allow houses and apartments/condos on side streets connecting to Calumet Avenue                      | 78%        | 20%  | 2%         |
| More trees and landscaping   | 69%        | 24%  | 8%         |
| Improve the design, maintenance, and aesthetic quality of parking lots                               | 69%        | 25%  | 6%         |
| improved streetscaping (decorative streetlights, seating areas, trash cans, decorative paving, etc.) | 65%        | 22%  | 12%        |
| Allow taller buildings   | 64%        | 26%  | 10%        |
| More open space/green space  | 61%        | 34%  | 5%         |
| Allow small-scale, light manufacturing and production along Calumet Avenue                           | 59%        | 28%  | 13%        |
| Encourage more bicycle parking at stores   | 58%        | 34%  | 8%         |
| Reduce the size of large parking lot expanses  | 57%        | 33%  | 10%        |
| Require public space as part of new large-scale developments and redevelopments                      | 51%        | 45%  | 4%         |
| Allow houses and apartments/condos directly along Calumet Avenue                                     | 40%        | 31%  | 28%        |
| Encourage dog-friendly establishments  | 34%        | 36%  | 30%        |

#### **Zoning Reforms**

#### **Housing Affordability**

| Which of the following reforms would you like Manitowoc to explore to make new housing more affordable? | Support | Neutral | Oppose |
|---|---------|---------|--------|
| Allow smaller homes   | 72%     | 17%     | 119    |
| Allow a mix of single-family homes and duplexes in new neighborhoods                                    | 62%     | 17%     | 219    |
| Allow smaller lots to build homes on  | 55%     | 26%     | 199    |
| Allow accessory dwelling units to be built on lots with existing single family homes                    | 43%     | 26%     | 319    |
| Allow some single-family homes to be converted into duplexes  | 44%     | 36%     | 219    |
| Allow increased building heights  | 42%     | 19%     | 399    |
| Allow a reduced amount of required parking  | 33%     | 42%     | 269    |
| Allow homes to be built closer together side-by-side (i.e. reduced setbacks)                            | 27%     | 27%     | 459    |
| Reduce the number of public hearings required for new housing development                               | 25%     | 40%     | 359    |

#### **Economic Development**

| Which of the following reforms would you like Manitowoc to explore to promote economic development and address vacant commercial spaces? | Support | Neutral | Oppose |
|--|---------|---------|--------|
| Allow shared parking lots between compatible uses  | 85%     | 13%     | 29     |
| Allow small, low-impact businesses in residential neighborhoods  | 64%     | 16%     | 209    |
| Allow ground-floor residential uses in commercial spaces   | 45%     | 36%     | 189    |

#### Industrial

| As older industrial areas are redeveloped and newer industrial areas grow, which of the following reforms would you like Manitowoc to explore? | Support | Neutral | Oppose |
|--|---------|---------|--------|
| Require increased anylronmental protection standards for protection mature trees and wetlands  | 73%     | 18%     | 9%     |
| Limit the visual/noise impacts of trucking, loading, logistics, and outdoor storage  | .70%    | 24%     | 6%     |
| Require increased landscaping and buffering from non-industrial uses   | 65%     | 32%     | 3%     |
| Allow multifamily housing nearby industrial areas  | 59%     | 25%     | 16%    |
| Require detailed architectural review of new building designs  | 53%     | 34%     | 13%    |
| Allow for larger and faller industrial buildings.  | 46%     | 39%     | 15%    |
| Require industrial employers to provide walking and biking paths that connect to their facilities  | 44%     | 43%     | 13%    |

#### Design

| Which of the following reforms would you like Manitowoc to explore to improve the design of new, neighborhood-compatible construction?   | Support | Neutral | Оррозе |
|--|---------|---------|--------|
| Limit the amount of parking to prevent large expanses of parking lots that sit empty asost of the time   | 64%     | 31%     | 6%     |
| Require a detailed architectural review of new building design in high-vhibility locations (Downtown, Calumet Avenue, Memorial Drive, etc.)  | 64%     | 23%     | 14%    |
| Require high-quality landscaping on new large developments and parking lots  | 60%     | 25%     | 15%    |
| Require enhanced building materials such as brick, stone, masonry, and other highly<br>durable materials in high-visibility locations (Dosantown, Calumet Avenue, Memorial<br>Drive, etc.)       | 56%     | 27%     | 17%    |
| Require new buildings to match some of the design (style, massing, setbacks, etc.) of<br>surrounding buildings in high-violatility locations (Downtown, Calumet Avenue, Memorial<br>Drive, etc.) | 48%     | 34%     | 18%    |

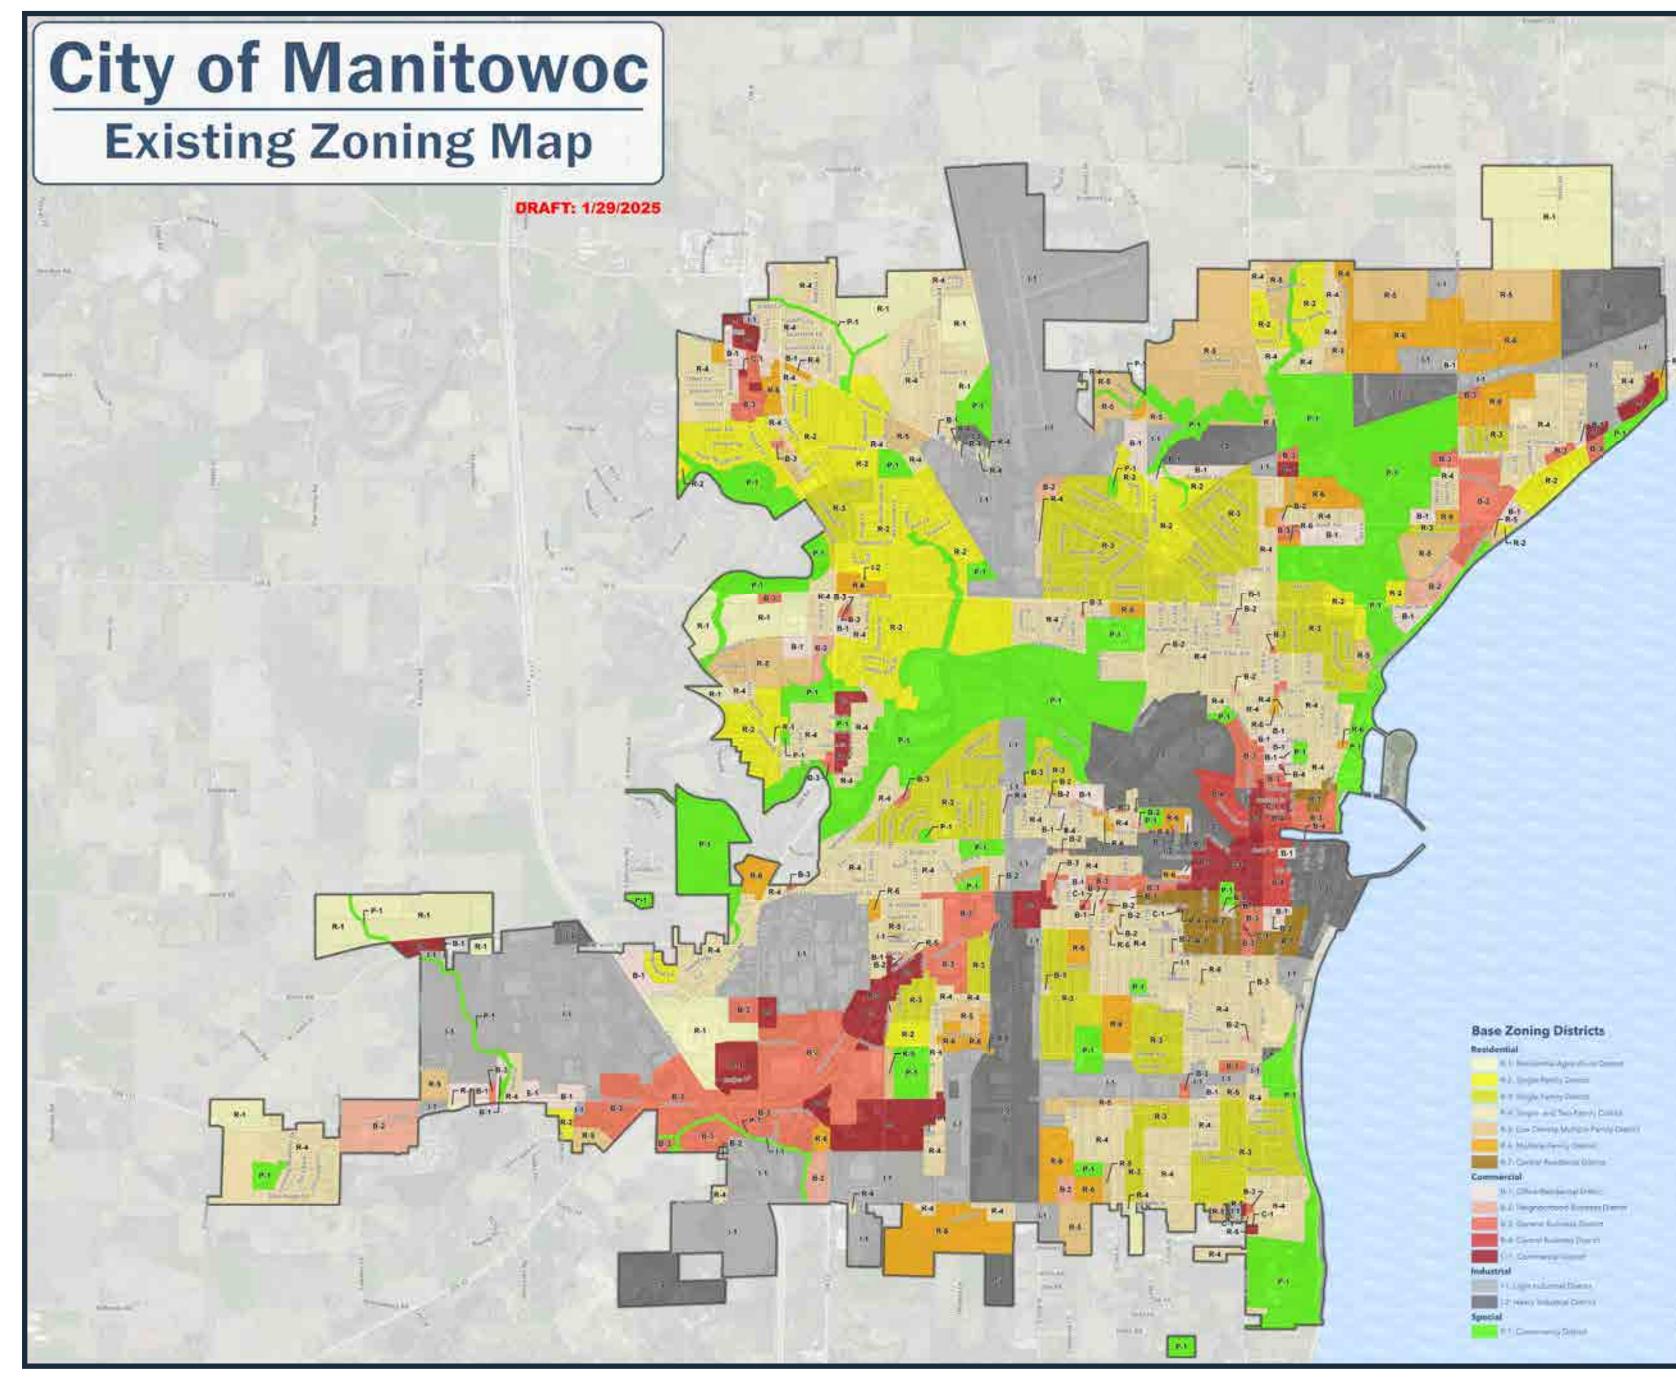

# ZONING MAP: EXISTING & PROPOSED

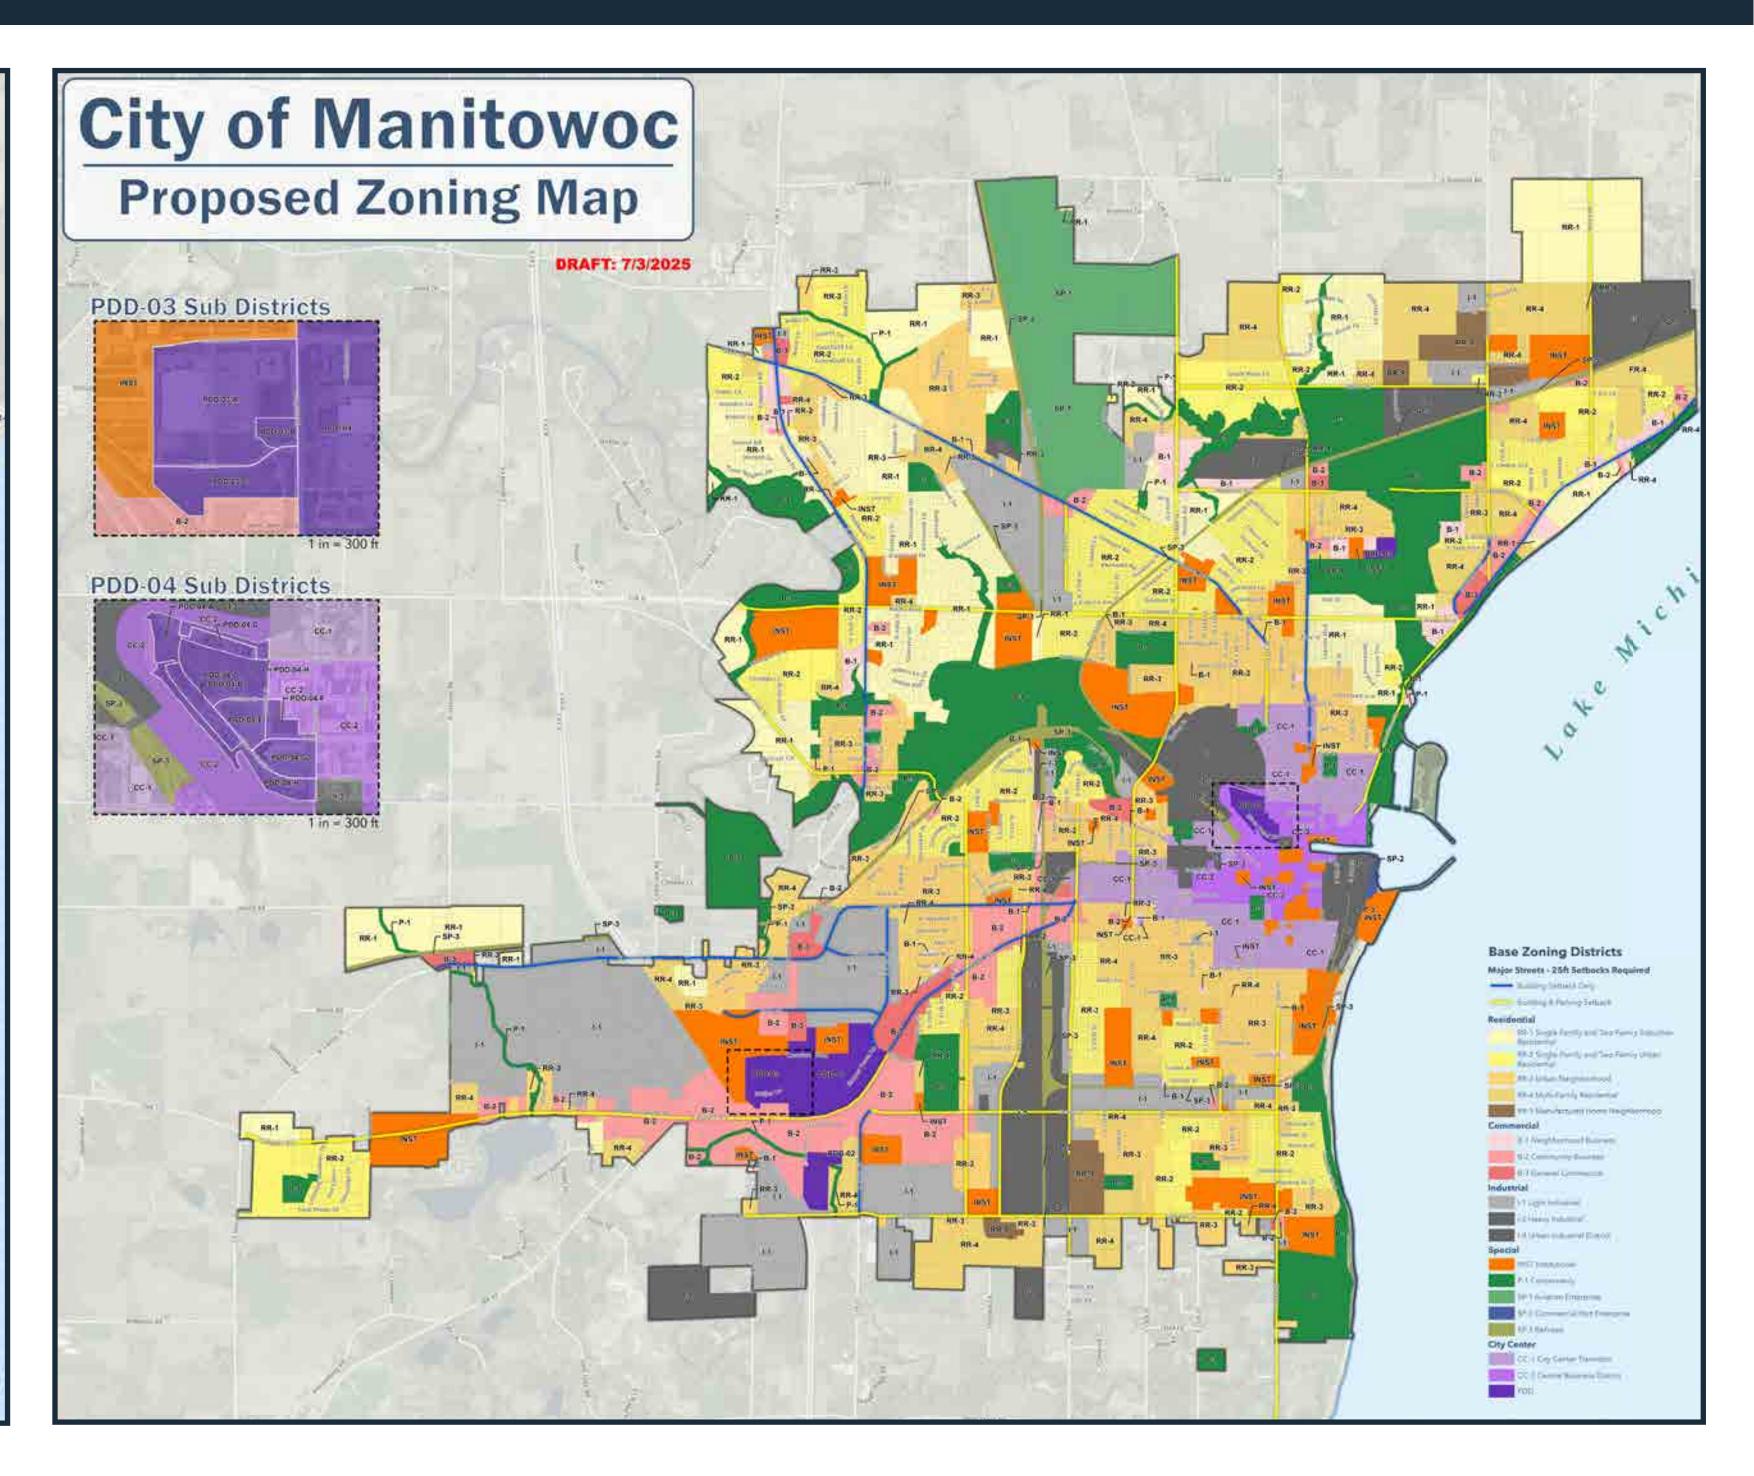

### **ZONING MAP EXPLAINED**

Every property in the city is designated by a zoning district. Zoning districts...

The proposed zoning map looks different due to a number of proposed changes, including:

- Consolidation of Downtown districts into new "City Center" and "Central Business" districts
- Consolidation of residential districts from 7 districts to 4 districts (and 2 additional special residential districts) See Board 4 for details
- Consolidation of B-1 and B-2 commercial districts into the B-1 district
  - Creation of 5 special districts to contain specific land uses (Institutional, railroads, aviation, port/marina, and urban transition) See Board 4 for details

### WHAT IS HAPPENING TO MY PROPERTY?

Use the map and legend on the left to identify your existing property zoning, then compare with the map and legend on the right. Did your zoning district change?

Don't worry, zoning only affects what can be built in the future, not what exists today. Everything that exists today is allowed to continue existing. Furthermore, the zoning rewrite is focusing on expanding what can be built on properties, not further restricting them. For specific questions about your property, look for more details on the exhibits about your zoning district. We welcome your feedback and may incorporate additional changes before the final draft is reviewed for adoption by the Common Council.

# ZONING DISTRICTS:

# EXISTING & PROPOSED

### ZONING DISTRICT CHANGES EXPLAINED

There are four categories of zoning districts in Manitowoc: Residential, Business, Industrial, and special districts. This exhibit shows the before and after of the proposed zoning district changes.

To see how a district would change, identify the existing district on the left side of each table, then see how it corresponds to the proposed district on the right side. Some districts, like the R-1 and R-2 district, are proposed to be consolidated into the proposed RR-1 district. As a result, all existing R-1 and R-2 properties would be regulated the same way moving forwards.

Some districts are not changing their name and will continue to be referred to the same way, including all industrial districts and the P-1 Conservancy district. There are still, however, some changes to districts without name changes.

# Residence Districts

| Existing District                   | Proposed District                                       |
|-------------------------------------|---|
| R-1 Residential-Agricultural        | RR-1 Single-Family Suburban                             |
| R-2 Single-Family                   | Residential   |
| R-3 Single-Family                   | RR-2 Single-Family and Two-<br>Family Urban Residential |
| R-4 Single- and Two-Family          | RR-3 Urban Neighborhood                                 |
| R-5 Low Density Multiple-<br>Family | RR-4 Multi-Family Residential                           |
| R-6 Multiple-Family                 | KK-4 Moni-ranny Kesidennai                              |
| R-7 Central Residence               | CC-1 - City Center Transition*                          |
| n/a                                 | RR-8 Planned Mixed<br>Residential                       |
| n/a                                 | RR-9 Manufactured Home<br>Neighborhood                  |

<sup>\*</sup>The proposed CC-1 City Center Transition District would include all existing R-7 properties and also some B-1, R-6, and R-4 properties within the City Center boundary. See exhibit 6 for details.

# Business/Downtown Districts Special Districts

| Existing District                | Proposed District             |
|----------------------------------|-------------------------------|
| B-1 Office-Residential           | D 1 Nicialda cuba ad Ducinaca |
| <b>B-2 Neighborhood Business</b> | B-1 Neighborhood Business     |
| B-3 General Business             | B-2 Community Business        |
| B-4 Central Business             | CC-2 Central Business*        |
| C-1 Commercial                   | B-3 General Business          |

<sup>\*</sup>The proposed CC-2 Central Business District would include all existing B-4 properties and also some C-1 and B-3 properties within the City Center boundary. See exhibit 6 for details.

# Industrial Districts

| Existing District    | Proposed District    |
|----------------------|----------------------|
| I-1 Light Industrial | I-1 Light Industrial |
| I-2 Heavy Industrial | I-2 Heavy Industrial |
| n/a                  | I-3 Urban Industrial |

| Existing District | Proposed<br>District                        |  |
|-------------------|---|--|
| n/a               | INST Institutional <sup>1</sup>             |  |
| P-1 Conservancy   | P-1 Conservancy                             |  |
| n/a               | RLRD Railroad <sup>2</sup>                  |  |

| n/a               | UT Urban Transition <sup>5</sup>            |  |

- 1. Several existing parcels with institutional properties (civic, governmental, cultural, public, religious, and other similar uses) would be rezoned into the INST Institutional district.
- 2. Existing railroad properties would be rezoned into the SP-01 Railroad district.
- 3. Existing airport and airport-supporting properties would be rezoned into the SP-02 Aviation Enterprise district.
- 4. Existing port, marina, and port enterprise supporting properties would be rezoned into the SP-03 Commercial Port Enterprise district.
- 5. Newly annexed properties currently outside city limits could be zoned SP-04 Urban Transition upon annexation if there is not an immediate plan for their development under another zoning district.

### WHY ARE THE ZONING DISTRICTS CHANGING?

The Zoning Ordinance Working Group and consultants GRAEF and Civi Tek are proposing consolidating several districts and creating several new districts as a result of reviewing the city's plans, community engagement, and state policies. Once changes were proposed to the existing districts, some districts were extremely similar and made sense to be combined. Many new districts are proposed to separate certain land uses like railroads, airports, mobile homes, and institutional properties due to state policies that make them otherwise difficult to regulate.

# RESIDENCE DISTRICTS

### OVERVIEW OF PROPOSED KEY CHANGES

### RESIDENCE DISTRICT CHANGES EXPLAINED

Most of the city is zoned residential, most people live in a residential district (some live in a business/downtown district, too), and most of the proposed changes to the zoning code are related to residential zoning.

The proposed changes to zoning include a number of key changes supported by the city's Comprehensive Plan and Housing Needs Assessment to allow for the creation of more affordable, smaller homes, including:

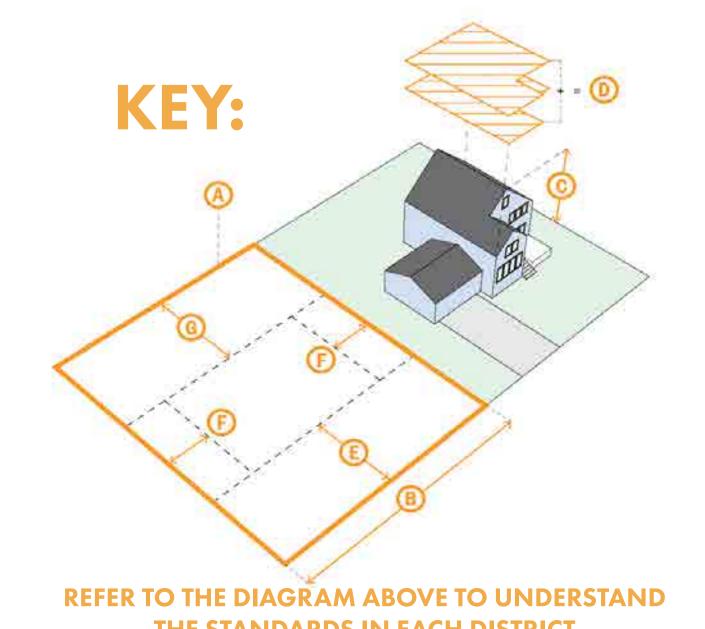

- Options for smaller minimum lot sizes and narrower lots
- Legalizing two-family/duplex and townhomes in more areas of the city
- Legalizing up to 6 housing units per structure on larger lots in the urban core
- Allowing smaller front yards in the urban core to increase buildable area
- Allowing buildings downtown to be 20 ft taller than current code allows
- Ensuring the zoning code accommodates recent, market-rate development

### PROPOSED RR-1 SINGLE-FAMILY RESIDENTIAL DISTRICT

|                                 | Existing R-1   | Existing R-2  | Proposed<br>RR-1 |

neighborhood.

# DOWNTOWN DISTRICTS

OVERVIEW OF PROPOSED KEY CHANGES

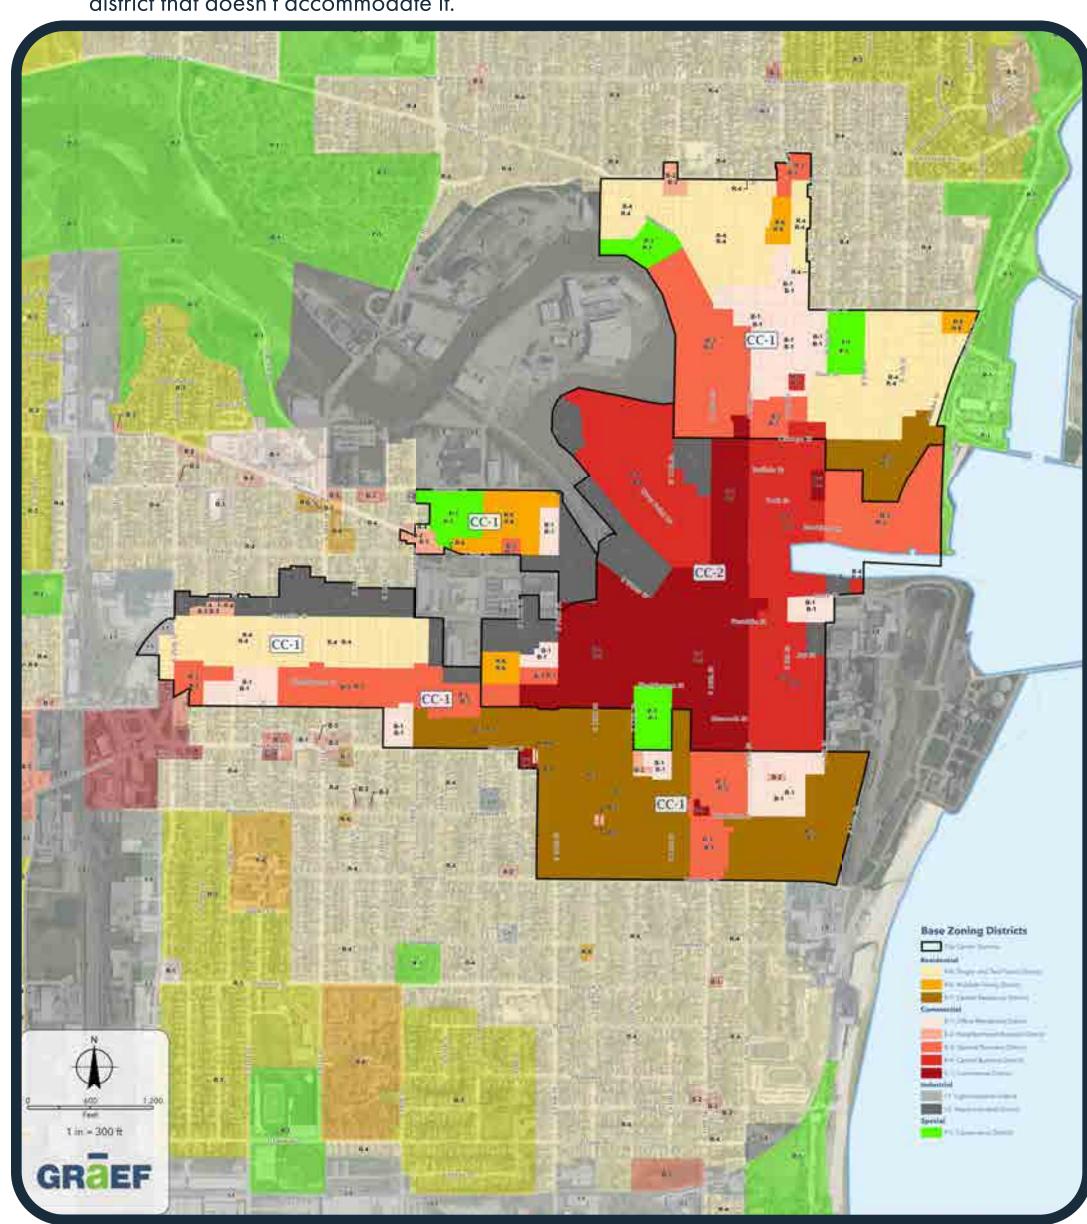

### "CITY CENTER TRANSITION" AND "CENTRAL BUSINESS" DISTRICTS EXPLAINED

Downtown is intended as a mix of complementary, walkable, and dynamic uses that create a compact physical area. Today, Downtown consists of a mix of different zoning districts. Each district permits a different range of uses, sometimes within the same block. This sometimes requires unnecessary rezoning of individual properties to accommodate new construction that we know complements existing uses - slowing down investment and creating uncertainty around what is actually legally acceptable.

The proposed changes to Downtown involve consolidating the Downtown into 2 districts - "City Center Transition" and "Central Business" which better reflects the way we already think about and regulate new construction Downtown today. These boundaries largely reflect existing regulations the city uses, such as the Downtown Design Review Area and the boundaries of the existing C-1 Commercial District, B-4 Central Business District, R-7 Central Residence District, and I-2 Heavy Industrial District.

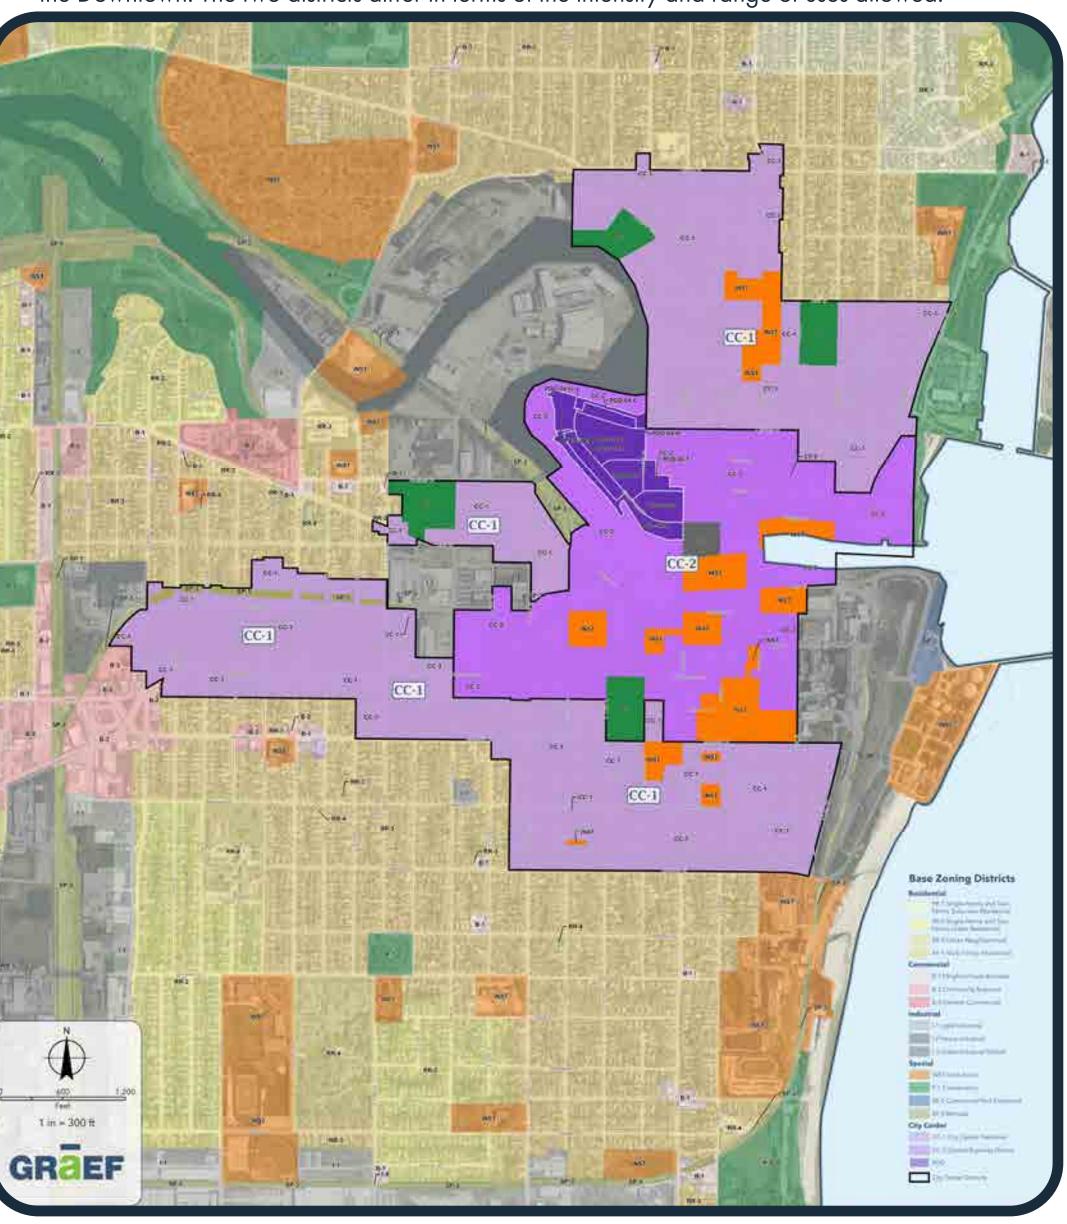

### **Existing Downtown Zoning**

The Downtown today consists of a varied mix of land uses and zoning districts that are largely compatible with each other but regulated differently. This patchwork requires rezoning if a desirable Downtown land use happens to be proposed in a district that doesn't accommodate it.

### **Proposed Downtown Zoning**

The proposed Downtown Zoning would consolidate the Downtown into two districts (excluding park, institutional, and governmental properties). The two districts focus on accommodating a mix of compatible uses in a walkable, mixed-use environment consistent with how we already think of the Downtown. The two districts differ in terms of the intensity and range of uses allowed.

### **CC-1 City Center Transition District**

This district is intended to accommodate existing and new land uses that are compatible with the Central Business (CC-2) district and the surrounding areas by providing an intermediate intensity/density of compatible commercial, institutional, and residential uses.

#### **CC-2 Central Business District**

This district is intended to offer greater flexibility in area requirements and height regulations than other districts in order to encourage new construction or re-use of real estate in the Central Business District and immediately surrounding areas. The Central Business District Zone is intended to promote the viability of the Central Business District as the single most important concentration of business, professional, governmental and financial services in the City of Manitowoc.

#### V

P: Permitted

C: Conditional use permit\*

[blank]: Not permitted

Note: The table shows
a selection of notable
land uses. To view
a full listing of land
uses proposed in the
updated zoning code,
refer to Appendix A
- Land Use Table as
part of the September
24, 2025 Plan
Commission agenda
packet.

\*A conditional use permit is a special permit that requires, among other things, a public hearing and detailed review of the proposed use before it can be granted a zoning permit.

# LANDSCAPING

Manitowoc's current landscaping

developments!

requirements focus mostly on parking

lots. There's a lot more opportunity to

promote healthy vegetation in new

### OVERVIEW OF PROPOSED KEY CHANGES

### LANDSCAPING REQUIREMENTS EXPLAINED

Landscaping requirements are a common zoning tool to ensure that new construction contributes positively to the overall appearance and ecosystem of the community. In a zoning code, landscaping serves the following purposes:

- Maintain and increase property values
- Buffer incompatible land uses

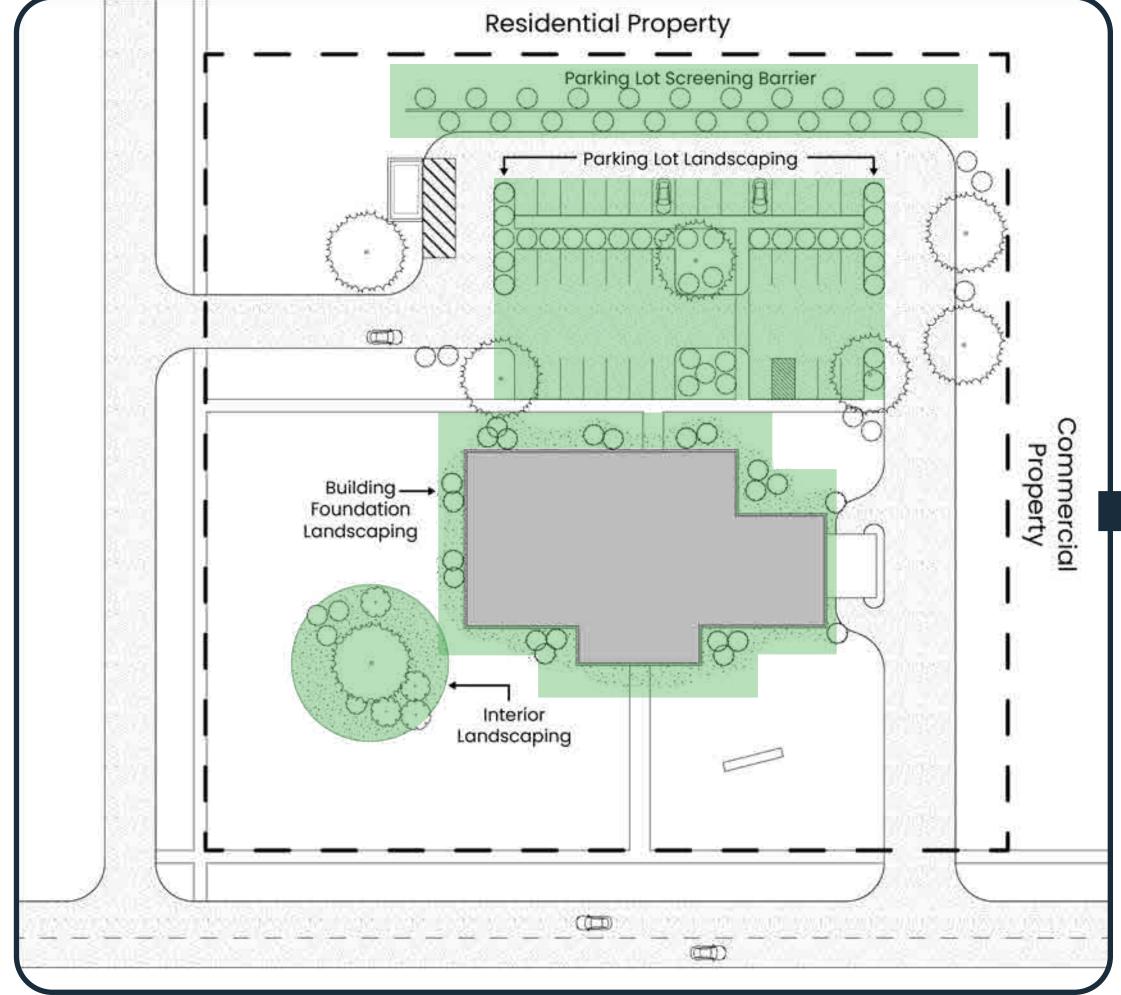

- Provide a healthy environment for a healthy
- Protect public and private investments
- Provide lasting aesthetic benefits

The current zoning code requires minimal landscaping, mostly around parking lots, and does not adequately contribute to the community's vision. As part of the zoning rewrite, new landscaping requirements are proposed to increase requirements for landscaping in new construction while also providing additional guidance and flexibility for how to provide better landscaping, including:

- Landscape buffers between different intensities of zoning districts (i.e. between industrial and residential)
  - Parking lot landscaping Street trees
    - Interior landscaping

- Waste enclosure landscaping
- Sign landscaping

# **EXISTING LANDSCAPING REQUIREMENTS**

### **Building Foundation Landscaping**

Landscaping around the perimeter of a new building is required, but the current zoning code isn't specific about how much or how large the landscape area needs to be.

### **Parking Lot Landscaping**

Parking lots are required to have landscaping around their perimeter and interior. If the parking lot is 25 spaces or fewer, only perimeter landscaping is required. The number of trees required is based on the number of parking spaces and which zoning district the parking lot is in. Parking lots bordering residential properties require a screen (fence or plantings) to block noise and light.

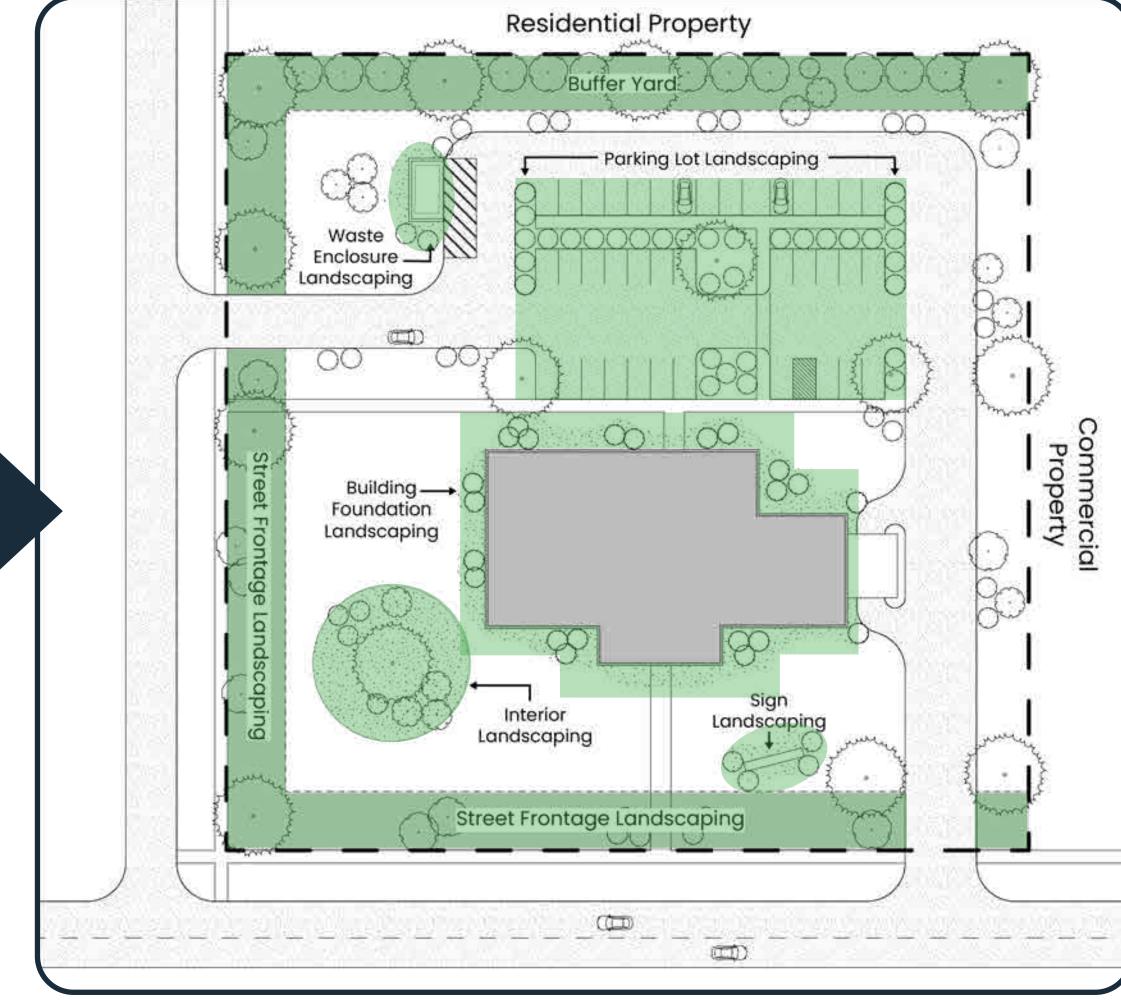

### Interior Landscaping

No specific interior landscaping is required, but it is allowed and can be used to substitute other landscaping requirements to provide design flexibility.

#### **Natural Resource Protection**

The current code allows natural resources to be protected, such as wetlands and forested areas, but does not require protection beyond basic requirements from the Wisconsin Department of Natural Resources.

### PROPOSED LANDSCAPING REQUIREMENTS

In addition to the existing landscaping requirements listed on the left, the proposed zoning code would add the following:

### **Zoning Bufferyards**

When zoning districts are substantially different (i.e. commercial or industrial next to residential), a landscape bufferyard would be required. Five (5) different intensities of bufferyards are proposed based on the degree of compatibility between properties. A bufferyard generally consists of a mix of landscape materials (trees, shrubs, etc.) with defined quantities for each type.

### **Street Frontage Landscaping**

Street trees and additional landscaping would be required along public streets to enhance the look and feel of new developments. The required landscaping would differ based on the type of street and zoning district.

### Waste Enclosure and Sign Landscaping

Dumpsters would be required to be enclosed by a solid wall or fence and include landscaping around the enclosure where visible from public areas. Freestanding signs would require landscaping around their base.

#### **Natural Resource Protection**

The project team is still exploring specific natural resource protection requirements for wetlands, trees, and other similar resources.

# PARKING

### OVERVIEW OF PROPOSED KEY CHANGES

#### PARKING REQUIREMENTS EXPLAINED

Parking requirements control how a development builds parking. These rules were adopted amid growing car ownership in the mid-20th century. However, strict application of parking requirements has led to some negative consequences the City is trying to address:

- Parking spaces dramatically increase the cost of development, about \$5,000 for each surface parking space and up to \$50,000 for structured/covered parking space.
- Parking minimums can prevent business expansion when properties aren't big enough to accommodate more spaces.
- Oversized parking lots contain too much asphalt and have negative aesthetic and environmental impacts.
- Overemphasis on parking reduces walkability and transit use.
- Developers often know how much parking their property needs better than one-size-fits-all parking requirements.
- Inflexible requirements lead to repeated exceptions and unfair enforcement of City policy

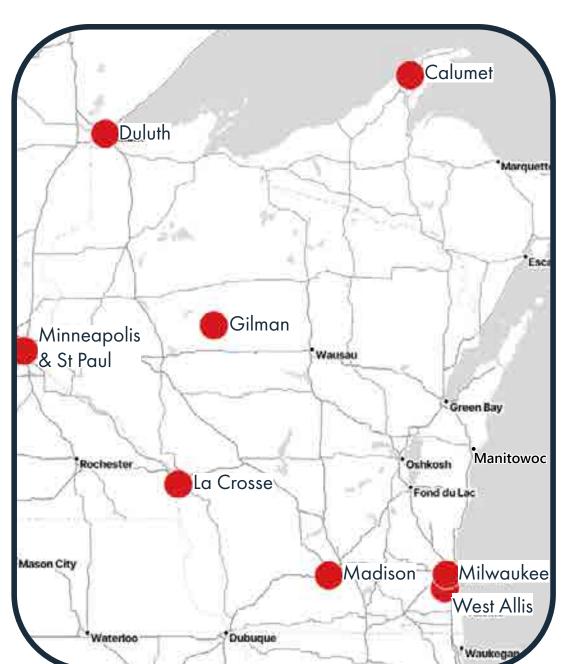

The current zoning code requires specific parking amounts for all types of development, except for non-residential development in the Downtown. However, cities across Wisconsin are reducing or eliminating parking requirements in favor of allowing new developments to propose the parking they need on a case-by-case basis.

#### **EXISTING PARKING REQUIREMENTS:**

Manitowoc uses a complex set of formulas to calculate parking requirements for each development, included in the Zoning Code Chapter 15.430. Oftentimes these requirements are viewed as overly restrictive and have to have special exceptions made to make a development pencil out.

#### **PROPOSED PARKING REQUIREMENTS:**

The proposed parking requirements would shift the focus from the quantity of spaces to the design and quality of how a site is accessed by all modes of transportation. This includes new standards for creating appropriate transit access, screening unsightly dumpsters, providing adequate fire department access, and providing connections between properties. No prescribed minimum amount of parking would be required for new construction, and developers would propose the amount of parking on a case-by-case basis. The proposed parking and site design requirements will be drafted following Plan Commission discussion on this topic.

### Cities that have completely eliminated minimum parking requirements:

Several cities in and around Wisconsin of varying sizes and locations have eliminated minimum parking requirements for all new developments. Instead, these communities work between City staff and developers to determine the appropriate amount of parking for each development on a case-by-case bases. These communities consider the trade-offs between parking, the environment aesthetics, and the economy. Each of these communities report increased investment and support from development as regulations have become easier to follow and more affordable to build.

# ACCESSORY DWELLING UNITS (ADU)

OVERVIEW OF PROPOSED KEY CHANGES

### **ACCESSORY DWELLING UNITS EXPLAINED**

Also known as a "Granny-Flat", "In-Law Suite", "Carriage House", or "Backyard Cottage". ADUs are a second home located on the same property as a principal residential structure. They are often; but not always, detached. This is a rentable or purchasable dwelling unit separate from the primary residence, and is typically smaller in size; perfect for fresh out of college individuals, or older adults looking to downsize. The City is looking at ADU for the following reasons:

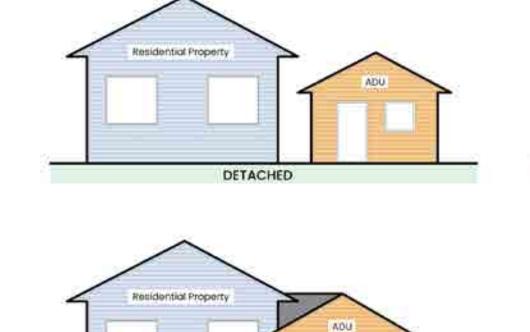

- Expand the number of housing units while using existing infrastructure (streets, sewers, etc.)
- Increase housing choices to respond to needs in the community including income levels, changes in household size, and lifestyle needs
- Create more opportunities for residents to age in place rather than leave their neighborhood to find more appropriate housing (i.e. senior living communities)

#### DRAFT ADU POLICY HIGHLIGHTS

The Common Council has been reviewing potential ADU policies for the past 2 years. The proposed zoning code would include the ability to construct an ADU on a single-family property under certain conditions:

- Where permitted: all residential "R" zoning districts and the B-1 Neighborhood Business District
- **Limit**: One per residential property
- Rentals: Rental ADUs must complete the City's Rental Registration
- **Setbacks**: Front yard same as principal structure. Side and rear yards 2 feet.
- Size: Minimum 200 square feet. Maximum 900 square feet.
- Height: Not to exceed principal structure
- Outdoor space: Must be provided with at least 100 square feet of contiguous outdoor space (not including driveways)
- **Design**: Must be designed similarly as the principal home
- **Inspections**: Inspection is required prior to occupancy, in addition to a deed restriction.
