

Manitowoc CDF Enhancement Area Project Concepts

Project Goals:

- Enhance the area for songbirds, pollinators, and monarchs
- Continue to discourage gulls and nesting birds from using the area
- Provide food and resting areas for millions of songbirds migrating along the Lake Michigan shoreline
- Complement existing CDF plans for maintaining access for offloading and storage of dredged materials
- Reduce maintenance and mowing costs
- Support recreational opportunities for local citizens and tourists
- Keep invasive plants from spreading
- Establish partnerships to support project activities
- Generate additional economic activity by enhancing community-owned assets

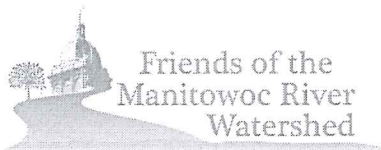

Proposed Outcomes:

- Plant approx 2.9 acres with native plants and shrub islands
- Add interpretive signs about local history and nature
- Maintain areas for recreation
- Control invasive plants in and around the CDF through herbicide treatments (about 8.3 acres)
- Provide support for short and long term maintenance
- Explore potential for future projects within and around the CDF

Potential Project Partners:

US Army Corps of Engineers
