Alder Novak,

Can we add this to the PI agenda for next week as informational. The attorney said it was up to us if we took to committee or not. It is permanent fill at a park so it seems appropriate.

Here is the map. I highlighted rough areas that we can dump. Mike Zimmer will stake the delineation line for us for limits.

I also think we should try to strip after I thought more about it and see the map. I will make a point to get out there and dig a couple holes to see what is below, but since we will stay on the upper portion I think it will pay. Would it be possible for you to seed it when complete?

Let's plan to meet one more time out there after Mike stakes and before you start stripping/dumping.

John,

We are trying to locate the delineation map for this site to be sure of where the wetland starts and ends. I will be in touch soon. Please don't begin work here until we identify limits. When would you need to begin dumping?
