SPECIAL PROVISIONS AND CONDITIONS

2022 Maritime Drive Bridge – Filling Voids and Raising Concrete Street Panels.

Intent and Scope of Work

The City of Manitowoc is looking to have a Contractor fill a known void under the street pavement adjacent to the bridge abutment wall of the Maritime Drive Bridge over the Little Manitowoc River, as well as other potential voids along the abutment wall and also to raise/lift concrete street panels on both sides of the bridge to achieve a more uniform longitudinal profile and hence a much better and smoother ride.

Previous observations indicated a void (approx. 3' X 3' X 15') at the southeast corner of the bridge.

The street panels have vertical differentials/dips ranging from 1-inch to 4-inches. The north curb line at the southwest corner of the bridge is the worst area.

It is also the City's intention to have the Contractor inject polyurethane foam material along the entire 48 feet width of the street along the south bridge abutment. The Contractor shall inject to a depth of 10-feet which would be approximately 1.5 feet below the abutment wall elevation. There have been past known voids at the bottom of the south abutment that were filled in 2012. However, those voids were filled with general grout and not polyurethane foam.

All material used to fill voids and raise street panels shall be a Polyurethane Foam that resists hydrolysis.

The Contractor shall base his cost per pound of polyurethane foam material injected. The City has an estimated square foot of surface to be worked on. The cost to complete work shall include all equipment, labor and materials to complete the specified work.

The City of Manitowoc shall furnish, install and maintain traffic control to completely close the work area to vehicle traffic. The road closure shall be for 3 days only.

No work shall be permitted between July 1st and July 5th.

All work shall be completed on or before August 12, 2022.

Pedestrian traffic on Mariners Trail (east side) shall be maintained at all times. The Contractor shall place their own cones or fencing warning pedestrians of the construction and shall be classified as incidental.

The Contractor shall be required to enter into a Contract with the City of Manitowoc for this work. The Contractor shall also be required to submit the proper insurance documents prior to execution of the contract. It is anticipated that this Contract could be approved at a May 2022 Board of Public Works (BPW's) Meeting. The Contractor shall not be permitted to start any work prior to the Contract being fully executed by the City.

All work shall be completed in accordance with the City of Manitowoc's Standard Specifications for Public Works Construction, especially Section 513 Mud Jacking. The Standard Specifications can be found on the City's website at www.manitowoc.org and then go to Departments/Engineering/Standard Specifications.
