Attn; Department of Infrastructure  
900 Quay Street  
Manitowoc, Wi. 54220

We have a lot of water accumulating in our back yards. We understand there is a storm drain pipe, under ground, along our back property line, but there is no drain pipe to the surface to allow water to be drained off.

The accumulated water in the backyard grew in size about 6 feet across per hour on 3/14/19. If we had the same kind of weather on 3/15/19 water would have been entering a basement, flooding a storage shed and flooding a garage. The water was reaching 3 feet deep along the back property line. Water accumulation in this area is a nuisance the rest of the year after rains. Takes weeks to dry out.

We are wondering if the city could add a drain pipe and grate that connects to the storm drain pipe that already in place so our lots can drain properly. Please contact Lynn Rockwell with your determination.

Greg -  
MR Lynn Rockwell  
Stopped in to see  
if anything was  
done with flooding  
issue in backyards  
Can you please call  
him.  
Thanks -  
Suzie
