No garbage and a good base for concrete and/or footings. I called Dennis Harding to see if he wanted to look at the test holes. He was happy that we had no garbage and will pass the info onto Hamann Const.  
Mike

TEST HOLE #1  
 SURFACE 2  
 2.5' SAND  
 4" PIPE CAP  
 1.5' BLACK TOP SOIL  
 5' HARD CLAY @  
 RED CLAY ↓

TEST HOLE #2  
 SURFACE ↓  
 4' SAND / CLAY MIX  
 1.5' BLACK TOP SOIL  
 1.5' SAND

1" = 50'

Chad,

As we talked this morning, we should also do the test holes over on S. 14<sup>th</sup> St. by the Gardens (lift station project) at the same time. Thanks.

Chad,

Per the discussion at the PI Committee Wednesday night, DPI staff needs to dig some test holes in the westerly baseball diamond area. See attached map.

There is a planned Veterans display (Ed Hansen & Dennis Hardy) for this area and they want to know whether or not there is municipal garbage (bottles and cinders, etc.) at this location.

The diameter of the proposed display is 32 ft.

Therefore, we should probably dig in about 2-3 different locations within the infield dirt of the diamond.

Please check for any underground utilities prior to digging. There is some power out there according to Mike Zimmer. There is also power to the scoreboards. I do not think that there is any utilities under the dirt area, but it needs to be checked out.

I would think that we would dig the test holes to a depth of approx. 5 feet below the existing grade.

These test holes need to be completed as soon as possible and before there is snow or frost in the ground. Thanks.

P.S. Does Dennis or Ed need or want to be there when we dig it. If so, you will need to call them. I do not have their phone numbers.
