RE: Requesting Fee Increase for Accident Trees

During the September Forestry Commission meeting, the Forestry Commission passed unanimously to request the fees for accidents causing damage to a city tree be raised from \$400.00 to \$750.00 plus tax. This increase is requested to cover the costs related to the removal of the tree and stump as well as the replanting a new tree.

The Forestry Commission also requested that funds be placed into a non - lapsing fund so that if the tree does not need immediate removal, the funds will be available when the tree is removed and replaced at a later date.
