Ref: Mini Parks Lighting

The small park, located at the southwest corner of the bridge, between the city hall parking lot and 8<sup>th</sup> street has no lighting. In summer, with the trees in full bloom, it becomes very dark through the park. Last summer, we had a homeless man residing in the park. In winter, it gets dark very early. The stairs get icy, and slippery. The lighting is very poor, as the nearest street light shining on this area is across the street, seventy five (75) feet away. It casts little light for the stairs or park.

This condition presents a safety hazard from slips and falls, and a life safety and security issue for the public.

We would like to request a light be installed in the park, as were installed along the south side of the waterway, north of 8<sup>th</sup> street.

The area
