

Capital Project Request Form

Request Type:

Department: Date:

Title of Request:

Department Priority

Linked to another project?
 Yes
 No

Project Request is: New Replacement Modification
Estimated Useful Life:

This is a limited field, please attach documents for more detail.

Description:

Basis of Cost: Quote Bid Estimate
Total Cost

Revenue (if any) Net Cost

Will there be additional costs in future years to complete this project?

select one: Yes No
If yes, amount?

Finance Dept: Account Sent to Dept:

Action:

CWG to approve ^{upto} ₹13,000 for project

Needs Finance approval

Good morning Steve,

I forgot to mention it this morning, but just a reminder that I am trying to figure out the process for seeing if money was budgeted in 2020 for the proposed GIS data migration. If not, I wanted to clarify that we would need to go through the CAWG process to have it funded in 2020. As a refresher, the project was described as:

- a. **GIS Data Migration : ArcGIS Schema and Architecture Consulting Services**
The City's GIS schema and architecture is currently using an outdated structure based on the 2009 GIS Needs and Assessment Plan. With the advent of ArcGIS Server and ArcGIS Online which allows for publication, the existing GIS structure has become an inefficient way to utilize the full capabilities of a powerful GIS. The current GIS structure requires many manual processes that could be automated and reduces the amount of information that can be shared within the City departments, as well as with the County and the public. Updating the City's GIS system to maximize the full potential of GIS will allow for more powerful tools (webmaps, mobile editing, live data, etc.) available throughout various City departments. The ability to share data and maps with the public will be more efficient and enhanced.

The expected cost is \$18,000.

Let me know if you need anything else.

Thanks.
