Dan,

Bob Pietroske called here again about his ditch and the standing water. He wants something done now. He claims that there is 2 feet of water in his driveway. I am not sure that is possible. I agree that there is 2 feet of water in the ditch.

I told him that we have been trying to work on a solution and getting prices for the work, but it was an unbudgeted item for 2018 and therefore it would have to go to our PI Committee in order for them to approve the funds to do the project.

It is complicated because we have phargmites which need to be dealt with. We also have a culvert pipe that need replacement but there are so many utilities around it that we will probably have to look at pipe bursting or something. Then there is funding all of this work plus the ditching of 1,000 LF or so.

We need to take this to the June PI Committee Meeting.

I would like to get some quotes from maybe Vinton, Bob Braun and Schuh for the ditching portion. I also need to look into the culvert replacement issue and the phargmites. No easy button for this one.

Good morning Bob,

I tried to get as-builts for USH 151 adjacent to your business and could not find the conversion to a concrete highway. From Google it appears water drains west to a drain at the east side of Office Max.

The issue appears to be on the other side of Grand Ave. To reiterate: this is a connecting Highway and the City of Manitowoc is the maintaining authority on this section of highway.

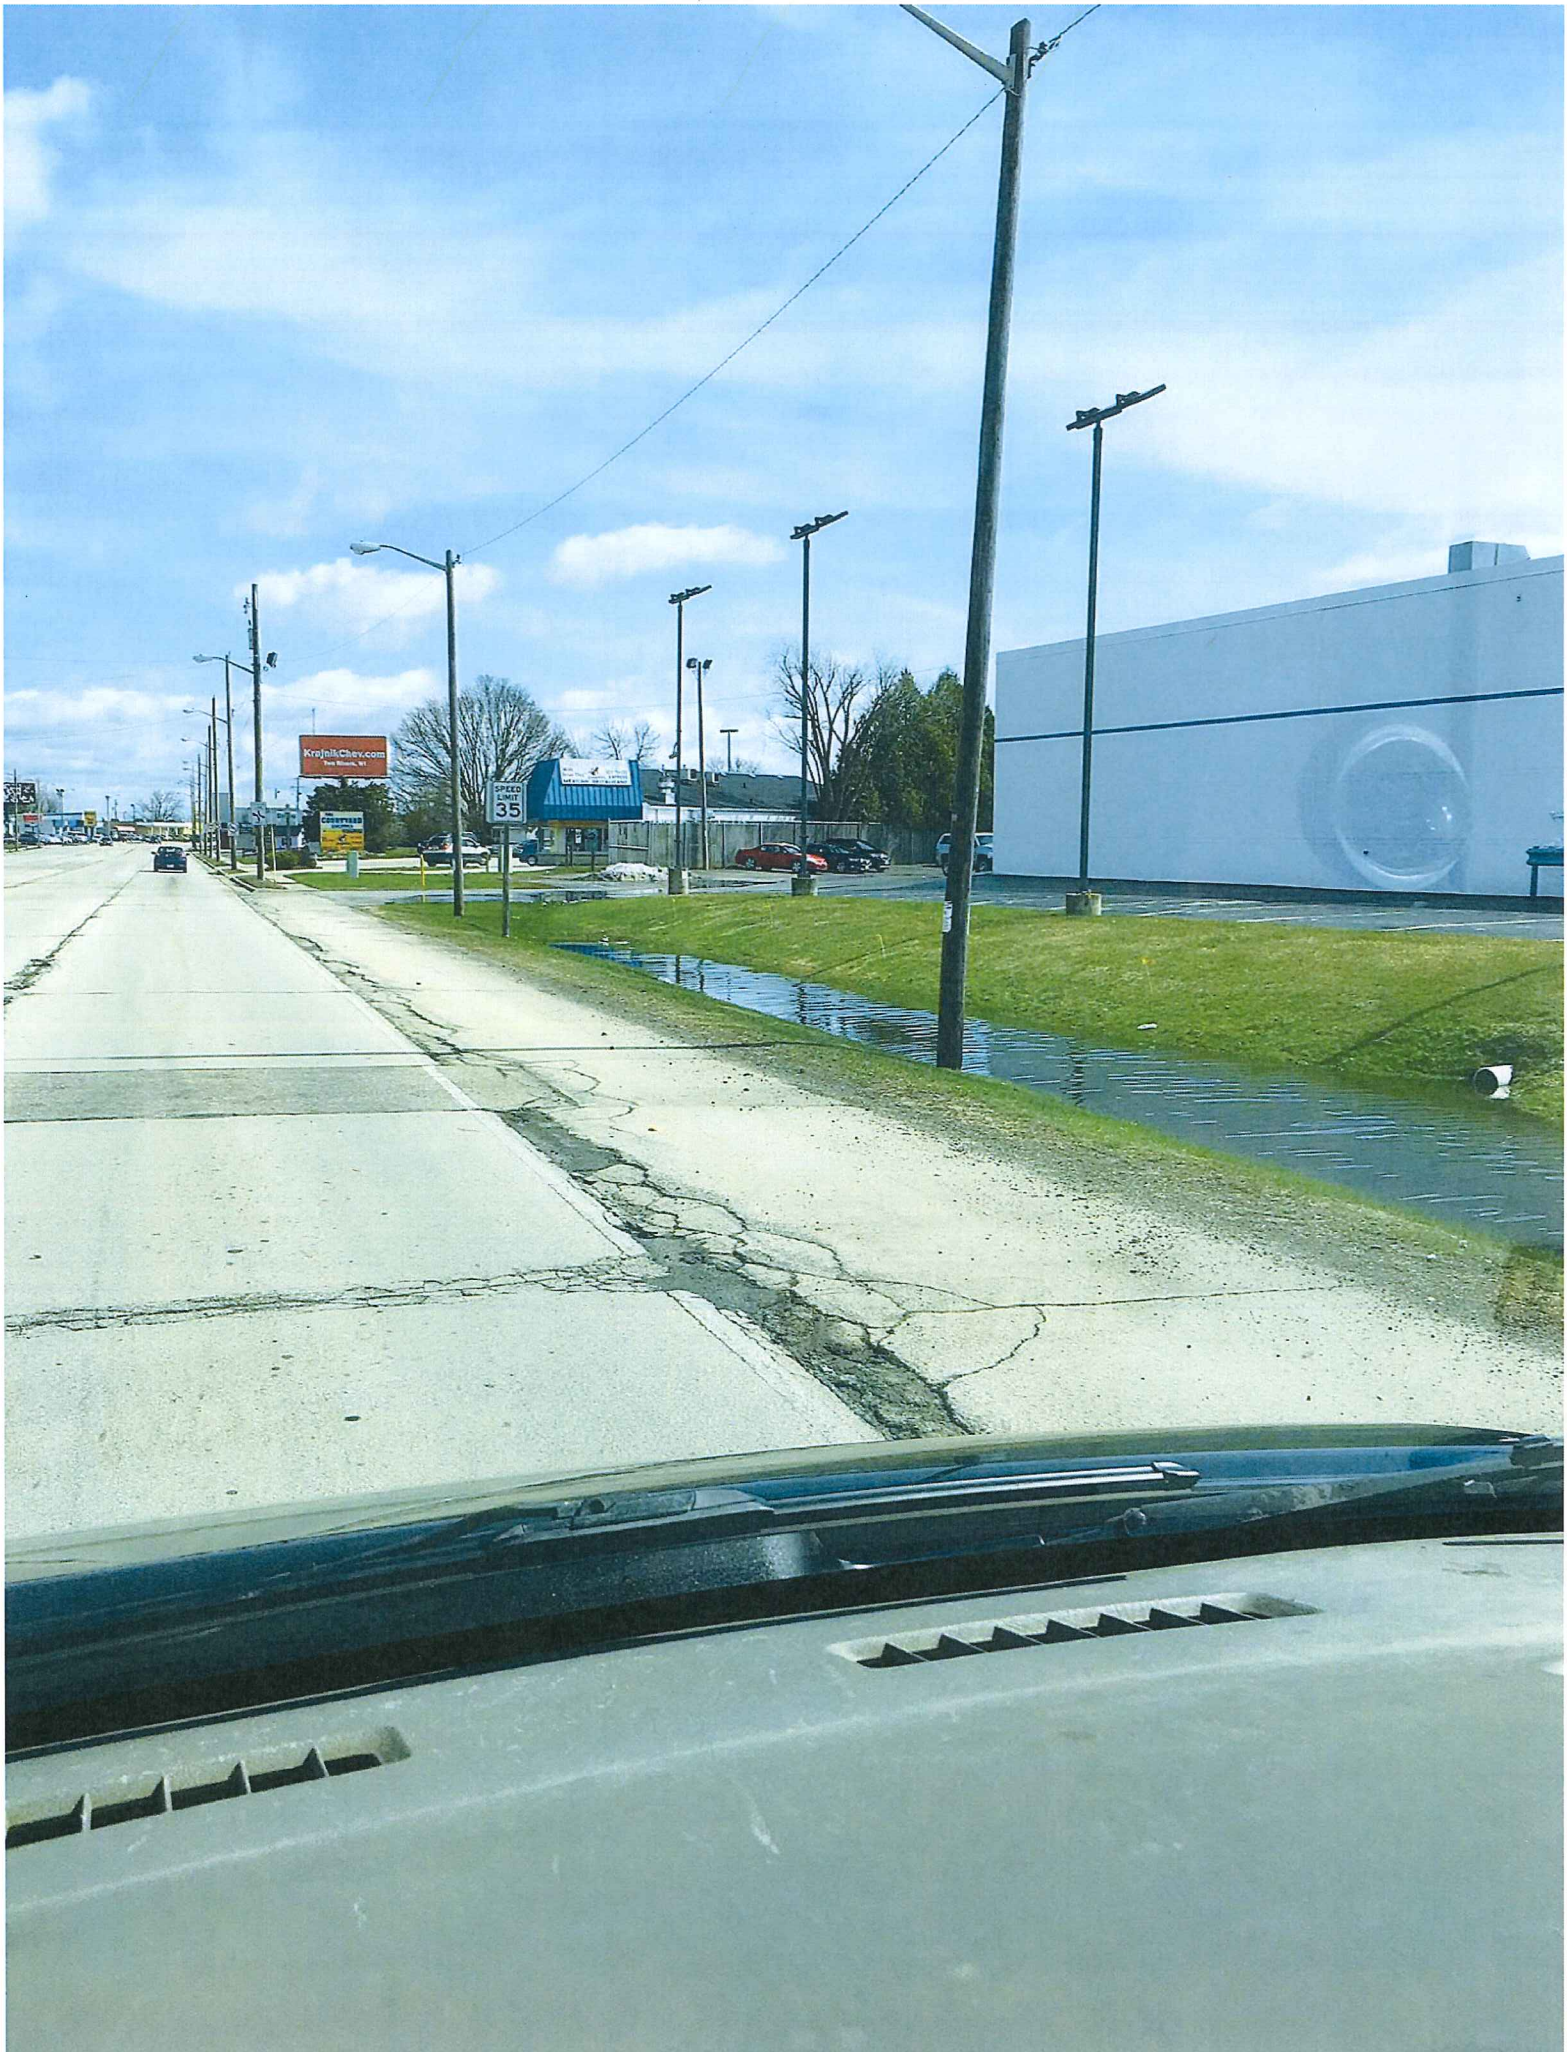

My supervisor is cc on this. If you have further questions you could talk to him. (920)492-5645

You can forward this e-mail to the City of they are saying it is not theirs.

Thanks,

Daniel Davis
