Subject: Request for Driveway Extension

Attn: Engineering Dept

I am writing to request an extension to our driveway at 4249 Springhill Dr. Our current driveway is 21' wide and we are looking to add an addition up to possibly 33' (per inspector's measurement) to fill in the grass area to the right of our current driveway to be able to utilize the 3rd car garage spot with more ease.

With now having more vehicles in the driveway (3 current drivers with a 4th one coming next spring) it has proven more difficult to maneuver up the driveway to access that garage spot without interfering with another vehicle or running over the grass. Also my husband's truck or our boat cannot use that garage spot due to the angle of entry. Winter months pose to be difficult as well as we will not have the use of the grass area to "run over" due to snowbanks.

I have included multiple photos showing our current situation. Any extension on the restrictions of this matter is greatly appreciated. Currently we have not obtained quotes to have any work done but would like to if given permission.

Thank you for your time and consideration,
Jessica Vogel

I stopped at site today. I also called Jessie in which she explained what they would like. They currently have a 21" wide driveway and would like to have a 32' wide driveway.

I told her 25' wide is the ordinance and if they wanted more they should write a letter to Engineering in which we would take to Board of Public Works for a decision. Engineering should look for a letter coming in.

Steve,

Please stop and look at driveway at 4249 Springhill Drive. Jessica Vogel called and they would like to take out the triangular piece of grass and put concrete in. Please let her know if this is feasible before they go out for price quotes. You can reach her at 920-860-0300 (or work 8-3:30 at 682-0713.

Thank you!

Hi Sonja,
Here are the photos of our driveway I was talking about at 4249 Springhill Dr. Let me know if I can proceed with getting an estimate done or what needs to happen next. Thanks, Jessica
