Lee,

Wade Marks would like to install some board walk at Camp Vits. Can we place the on the agenda for June for discussion and possible action?

Hey Chad,

I was just at Vits. Please see the attached picture. Can we lay down a wood boardwalk like this? Easy to install and move. I would guess that 1000 feet would need it right now.

We would like to have a grand opening of the river trail this year. I am thinking in July. Cool?

thanks!

Good Morning Chad!

Let's touch base about getting the trail off the ground and Vits. thanks!

I like it and we should pursue it.

I have gotten mixed remarks as to what permitting is needed for this. That would be the first starting point. We need to see if we need permitting from the DNR. Can you map total footage that you would propose. I will then get it into the hands of the DNR for comment. I don't think there will be any issues on the city's end. Especially with the new members of council.

I think DNR Pre approval and then bring to committee.

Hey Man,

I hope all is well!

Camp Vits is still wet in areas. I would love to get the trail off the ground! This park is so awesome but the season is sooo short. I attached a file with some pics. I want to make it a point to promote that Manitowoc is a MTB friendly area by improving this park and trail system.

Please let me know your thoughts. thanks!

I do think this one should go to committee, because it is more than just maintenance.

Sounds like a really cool project.

Dan,

Wade would like to install about 1000' of board walk at Camp Vits. It will be semi-permanent, but will be floating on the surface and will be able to be removed if needed very easily. My questions to you is if you think we need committee approval? The last time that we had the update from Wade at Committee, they seemed fairly comfortable with staff just working with Wade and confirming that whatever we were doing complying with all WDNR and city codes/laws. This does comply and I think it will greatly improve this trail system.

I would like to give Wade the green light if you are ok with that route. Let me know.

Good morning Chad, correct, if the boardwalk is just placed on posts and they don't result in any fill in the wetland, no permit is needed.

**We are committed to service excellence.**

Visit our survey at <http://dnr.wi.gov/customersurvey> to evaluate how I did.

**Subject:** Boardwalks in wetlands

Hello Carrie,

I have a couple questions. We are looking at putting a couple boardwalks in at some of our parks. One of them falls into some wetland area and one does not. These would be surface mounted and will not cause any fill or excavation. I was under the impression from previous conversations that we did not need any permits for this work, but just wanted to confirm. Can you let me know? If there are permits needed, is there a minimum length or width that qualifies it as a permitted walk?

thanks
