Follow Up Flag: Follow up
Flag Status: Flagged

Greg,

It does appear that the City may still be in the running for funding through the 2023 BRIC Grant application for Halvorsen Wet Detention Basin Design. The FEMA BRIC website shows the project status as "identified for further review". This means the application was selected and there is available funding under the applicable subtotals. One thing to note is the Federal Share on the FEMA website is \$85,720 while the grant application asked for \$123,750 of the project total of \$165,000. While the project may be funded, the amount of funding could be less than expected. As you mention below, you could also reapply this year for the 2024 FEMA-BRIC grant seeking the full 75% funding for the Halvorsen Wet Detention Basin. However, given the uncertainty you mention in moving forward with the Halvorsen Wet Detention Basin, perhaps it would make sense to let that play out further and then submit in 2025.

Pivoting to go after a BRIC grant this year ('24/'25) for the Custer Street Wet Detention Basin Design sounds reasonable, especially since the City owns the property. Please let us know if you would like us to proceed with developing the 2024 BRIC application for the Custer Street Wet Detention Basin Design Project. I believe we can perform the work for the grant for about \$13,500. If interested, we would develop a task order for the work and send it your way for review.

Please note that the Custer Street Wet Detention Basin project does not mitigate the flooding at the intersection of Mero Street and 29th Street, and the best location for a pond in that area is the sited location in Halvorsen Park. If this green space goes away, I am not sure there is another viable option to mitigate flooding along 29th Street.

Thanks,

Mike

Mike,

As you know, we applied for the 2023 BRIC Grant for the Halvorsen Pond, but I do not believe we were successful in getting that one or they delayed any decisions due to money.

Would it make sense to reapply for this pond for the 2024 BRIC Grant??

However, there has been some rumblings about not building the Halvorsen Pond. A party is possibly interested in building a new baseball field at this site. Not sure what will happen at this site yet.

We did acquire the land south of the Senior Center on the south side of Custer St. Perhaps, it would make more sense to submit a 2024 BRIC application for this Custer St. Pond project design??

Thoughts??

Not sure if you have seen this, I didn't look at it very close but I wonder if there are any stormwater / flood control projects that would be eligible.

Subject: External: FFY 2024 BRIC Program - Preapplication Notification

Greetings,

The Federal Emergency Management Agency (FEMA) has notified our office that the Notice of Funding Opportunity (NOFO) for the Federal Fiscal Year (FFY) 2024 Building Resilient Infrastructure and Communities (BRIC) program may be released in the coming weeks. Our office is now accepting preapplications ahead of the release of the NOFO to ensure communities have additional time to prepare for the coming grant cycle. Notice of Intent Preapplications from potential subapplicants are due to Wisconsin Emergency Management (WEM) by **November 22, 2024**. Our office will submit the BRIC FY24 NOFO upon its release.

For information regarding the BRIC program, including eligibility requirements and eligible project and planning activities, please visit <https://www.fema.gov/grants/mitigation/learn/building-resilient-infrastructure-communities>.

For information regarding subapplication eligibility and requirements please see the 2024 Hazard Mitigation Assistance Guidance: https://www.fema.gov/sites/default/files/documents/fema_hma_guide_082024.pdf

Please share this information broadly with eligible applicants and subapplicants and let us know if there are any questions. Thank you!

Respectfully,

Steph Cooksey
Hazard Mitigation Project Specialist
Wisconsin Emergency Management
