Hello

It looks like we would need to bring it to the PI Committee. Years ago they denied a similar request but we think they would support it now. Not sure how to proceed with this we should probably get some samples and figure out a plan. Likely we will not put any down until next year so we should have some time. Let me know what you think or give me a call to discuss.

I love the idea and will do what ever I can to help. I will have to run it past the Streets department to make sure they don't have any issues. We talked or I remember these being proposed by Janet many years ago but not sure why we didn't move forward.

The inlet curb heads come with a duck on them now not sure what else but I will take a picture today.
Stay tuned

See below. Do we have any thought on this. Not sure why we wouldn't allow them. It looks like they would like to buy some and put them around. I could also buy a few if needed.

Good morning Matt,

FMRW and the LNRP would like to discuss the possibility of using these emblems at each storm drain. There are funds available to assist with the project and we would be willing to work on placing the emblems at each drain in lieu of painting the area.

What do you think? It doesn't have to be this specific emblem, I just used this as an example. I don't know how they are applied. I do think I see a nail on the top right but maybe an epoxy is used.

Be Alert !

And from what I know, they are installed on the curb above the storm drain.
