**Subject:** External: mask extension ?

**Sirs:**

Please do not extend the mask mandate. It is unnecessary and frustrating.

Dr. Jay Bhattacharya, Professor of Medicine at Stanford, said the pandemic is over when the vulnerable have been vaccinated. The aged vulnerable in Wisconsin have been vaccinated, vaccines are now available to other groups.

Dr. Marc Siegel, also a medical professor and Fox News contributor, said these vaccines are very effective, - more than is usually the case.

I believe that should calm the tentative mindset. The science is "in".
