**Subject:** SIB funding

Can we start the process of applying for some SIB funding? Foth has a \$140,000 invoice for the engineering that has been done for the Manitowoc portion of the project, it's eligible for HAP reimbursement but the 20% match will need to come from another source. I've told them they'll need to extend the payment date on that invoice for several months while we wait for the FASTLANE decision and work on other elements, but it's likely we'll need the SIB money at some point. Let me know what you think, I'm available for a call on Friday if necessary or sometime next week.
