Hi Dan,

We do not allow anything to be attached to our trestles inviting the public to our right of way for recreational purposes. It's a matter of safety for the public and for our crews.

Thank you,
Jackie

Hi Dan,

Are they active railroad bridges?

Thanks,
Jackie Macewicz

Good Afternoon Jackie,

There is a group of people that are interested in connecting trail systems in parks across from each other on the Manitowoc River.

A couple of our alders have suggested the idea of attaching pedestrian bridges to either the side or under one of the two existing railroad bridges that span the river in this area.

Would the Railroad consider one of these two options?

Thanks

Dan
