It looks very nice to me and I can't imagine that anyone would not like it. The FOMT board were normally the ones that had input for additions like this more so than the city. Attached is what I remember looking at for these types of projects.

The grasses here look like perennials that will need to be trimmed off in the fall annually. I would want to be sure that they will take care of this. I will run it up the chain before I give you formal approval. I will try to get back to you by early next week.

Chad, the only thing Florence asked was that when linseed oil is put on it that a tarp be placed at the base so the oil doesn't ruin the base.

I didn't send it to the board, but to you first. I will forward it to them. Thanks, Judy

P.S. I had a really bad experience with a group that cut brush as a service project last week. Anyway, after expressing my frustration to the board at our last meeting it was decided if any group wants to cut brush in the future we will simply direct them to the park depts. in TR or Manty. So, that means you or Judy G. I was upset that this group didn't work with Jim Knickelbine to identify trees that should be left and what should be cut. Also, Jim was going to provide a herbicide and that never happened because of lack of communication. I hope this is OK with you.

Hi Judy,

Seems like a nice addition to me. Will there be any added maintenance needed by the city in the future for the additions? Has the FOMT board approved this?

Chad, I got this note from Florence Hanson. She would like approval for this design to complete the heron sculpture at the Waldo Blvd. Wayside. This will be at her expense. She has not been happy with the flowers around the sculpture...long story, but this would solve the problem as far as she is concerned. I think this should be a Parks and Rec. Dept. decision and not FOMT. Call me if you want a little more information. Judy 684-0828

Dear Judy, attached find a design from Manitowoc Landscape, for the Heron we donated to the Maritime Trail Association. Would this plan meet with the Maritime Trails' approval? Thank you, Florence Hanson
