10-year Pro Subscription:

The equipment operates from the subscription that is purchased for each Yalp product. This subscription will be included in the total cost of the quote and will be good for 10 years. We only sell Yalp with the subscription to take the burden off up front. When the 10-year subscription runs out, in order to operate the equipment an additional subscription will need to be purchased. The subscription will also include 24-hour service center for any troubleshooting if a problem does arise. See the Maintenance and Service Support below.

MYYALP SERVICE AND ACTIVATION SUBSCRIPTION

Every interactive is delivered with a subscription. With 3 subscriptions to choose from, there is a subscription for every customer. This annual subscription provides the product with extra cool features such as:

✓ **INTERNET CONNECTIVITY***
Internet connectivity (3G) AND data usage to provide instant service, analytics, remote access to control your settings, the latest firmware updates and many other benefits.

✓ **STARTER BUNDLE**
Each of the interactives are delivered with a starter bundle with our highest rated games and music packs to guarantee a great and complete experience out of the box.

✓ **YALP STORE ACCOUNT**
Visit the **Yalp Store** (yalp.store.com) to view all available games and music packs and to use your credits to add and install new content with a few simple clicks!

✓ **YALP CREDITS**
Receive credits annually with your (PRO & ULTIMATE) subscription** and easily buy new games, credits and content. Yalp Credits allow us to do fun promotions, rewards and a lot of cool freebies!

✓ **NEW GAMES**
In the **Yalp Store** (yalp.store.com) you are able to browse through all new and existing games and music packs.

✓ **MYYALP ACCOUNT**
Each customer will receive a MyYalp account login to do settings, look at play statistics or report any issues.

SIM card provided by Yalp has a coverage in most countries. If the case may be there is no coverage the SIM is excluded from the delivery and locally the customer needs to purchase a SIM. Remotely we guide the customer to build in the SIM which are just a few easy steps to follow.

ECO MODE

The Yalp Solar is designed to last typical Dutch winters, where it can offer at least 2 hours of play. To save more energy and be able to play longer during winter time, our Yalp interactives can be put in **Eco Mode.** In Eco Mode, the interactive playset will switch off during stand-by mode and switch back on when the button is pressed.

Internet Connected - Every Yalp Sona has a built in Internet Connection, so you can remotely control your own device. For instance, volume-settings, (automatic) On / Off times, and even advanced usage statistics you can access with your personal My.Yalp account. Every Also, this way Yalp can service your device from a distance and transfer new games.

Vandalism-resistant and all-weather proof - The Yalp Sona is specifically designed for heavy-duty outdoor use. Of course this means it is all-weather proof and vandalism resistant. The orange arch is double-reinforced, and the electronics are tucked away in a safety box.

Power usage - When played, the Yalp Sona uses about 60 watts. This is comparable to a light-bulb. The only power source you need is a regular power socket.

Sound - The Yalp Sona has two high quality speakers built into the arch. As an indicator, when at maximum volume the sound valume is 71dB. As volume-settings are fully adjustable, there is no need to worry about noise pollution.
