Here is the e-mail I sent to the DOT RR Coordinator about the proposed RRFB at the Schuette Park (Meadow Ln.) Crosswalk.

I have not heard back yet from him.

Assuming no issues with the DOT or Railroad, I would recommend that the City install an RRFB at this crosswalk. There is no doubt that this crosswalk is heavily used throughout the summer.

Hi Jared,

Are you aware of any stipulations or rules regarding the installation of RRFB's for a pedestrian crossing that is 45 feet away from the railroad tracks??

Due to the number of kids and adults alike that use the Schuette Park Playground, we have a request to install an RRFB for this pedestrian crossing.

I believe that we would like to move forward with the RRFB's for this pedestrian crossing, but want to make sure we are not violating any rules. Thanks.

Good morning,

I reached out to a few colleagues and they are not aware of any stipulations/rules regarding having a RRFB system near a Railroad Crossing. Keep in mind that we don't work with the Federal Railroad System so there "may be" some rules out there that we are not aware of. I don't have any contacts at the rail system that I could ask either. Hopefully this info helps?

Thanks,

Hello!

I am not aware of any stipulations with installing a RRFB system near a RR Crossing. I will check with some colleagues and let you know if that's ok?

Thanks!

Mark & Josh:

Do you know if there are any rules prohibiting RRFB's near a signalized railroad crossing??

The City's crosswalk is about 45 feet away from the tracks.

The Public Safety Committee is trying to determine if we should be installing one here based on complaints of difficulty crossing the street.

Subject: FW: Meadow

I had our Engineering Crews cut some brush on the north side of Meadow Lane by Schuette Park.

This was in regards to the complaint at the last Public Safety Committee Meeting about the crosswalk for the Park. Just want this information to be reported back to the Committee.
