Chad and Nick:

We could certainly look at installing the flashing LED bordered Stop Signs like we have at S. 10th and Dewey St. and N. 18th and Menasha Ave.

I believe that they cost about \$2,500 each.

Do we want to ask Chairperson Cumming to add this request to the October Public Safety Committee Agenda?

Can PD look up the accident data to verify what Mr. Karnofskoi is stating???

Subject: Traffic Concern (John Karnofskoi)

Good evening gentlemen,

I received a call last week from a concerned citizen by the name of John Karnofskoi.

John lives on the corner of Johnston Dr and Albert Dr. John stated that he considers this intersection a major safety concern as we recently had an accident there as well as earlier in the season. He also stated that he's lived there for a long time and has witnessed 1-3 accidents per year.

He said these are not weather related incidents but he believes inattentive driving and individuals running the stop. He would like us to look into this further and find a corrective action such as flashers etc.

Thanks

Have a great weekend

Sincerely,

Chad P Beeman
