Subject: Unbudgeted Request to CAWG for Custer Lane Storm Sewer Under Diversion Motors Driveway to Eliminate Flooding

Shawn,

The PI Committee discussed Item #24-1536 regarding flooding issues at 4336 Custer Lane back in June, and motioned to send an unbudgeted request to CAWG for Option 1 which is replacing the storm sewer under the driveway on Custer Lane.

I have attached the minutes from that meeting. I have also attached the staff recommendation memo that was given to the PI Committee.

The flooding in this area has been an issue for a very long time and is mainly being caused by runoff from the old Fleet Farm addition (1990's) which predated the current stormwater requirements.

This same issue was brought to the Committee a few years ago, but was placed on file.

We received a quote for the work from Vinton last week, which was for \$45,827. This did not include televising the new pipe, which would be another \$2,500. Therefore, I am requesting \$50,000 for the Unbudgeted CAWG Request.

Hopefully, a competitive bid situation will cause the price to be even lower.

Since, the cost of the project is higher than the \$25,000 threshold for a Class I Notice Contract/Project, we will have to bid out this project if the funding is approved.

Not sure if we will be able to get it bid out and constructed in 2024. May need to bid it this fall and do the work next spring.

Hot Mix Asphalt for restoring the driveway will not be available after the middle of November.
