Re: Request to enter into agreement with HMI for in-kind concrete repair

HMI is a Manitowoc based company that specializes in manufacturing concrete lifting equipment, materials, training and support for established and start-up concrete raising companies(example: Raise Rite). HMI hosts numerous training courses locally for new clients/contractors. HMI approached the city with a proposal to perform in-kind concrete raising/repair in exchange for approval to host client/contractor trainings on city property.

City staff is requesting approval to enter into an agreement with HMI to perform contractor trainings while performing basic example concrete repairs on various city properties. HMI and city staff would coordinate to identify which slabs and locations work best for all parties to conduct safe trainings.

Respectfully,

Parks and Recreation Division
