Subject: External: 9th St concerns

Good morning,

My name is Tanya Koehler, and I am a property owner on the 800 block of 9th street in the city of Manitowoc. We recently received notification requesting public input in regards to an LED sign proposed to be installed on our street. Currently, the curve warning sign is directly in my front lawn. We purchased our house last summer, and just in this short time, we have witnessed speeding daily on our street, as well as a few car accidents. I think an LED flashing sign will unfortunately not deter the drivers, that already speed on this curve, from driving that recklessly. I also have concerns that if the Led lights are installed on the current location, that it will flash directly into our home. We have a six month old in a bedroom that that would shine into.

I think a better option for deterring speeding on our street would be a set of speed bumps on both sides of the curve of 9th St. I'm hoping this is an option that can be brought up at the meeting on may 13th. Please feel free to reach out to me on this email if you have any more questions for me.

Thank you,

Tanya Koehler
