Re: Red Arrow Park Access Improvements Concept Review

The City of Manitowoc Parks and Recreation Division is submitting a concept design of the proposed beach access project at Red Arrow Park for review.

Along with the proposed beach access improvements, Parks is interested in a discussion regarding opening up the north end of the Red Arrow Park parking lot to allow for a one-way exit onto green street, as depicted in the attached concept.

Along with that option, Parks would like to explore a one-way vs. two-way drive for the full length of the east portion of the Red Arrow Park parking lot. One-way would result in 45° angled parking along Lake Michigan.

Thank you for the consideration,

Brock Wetenkamp
